ROACH CONTROL SYSTEM

Black Flag Roach Control System contains 12 bait stations that are effective for cockroach control for 30 days. Black Flag contains an odourless substance that cockroaches like to eat while inside the baits. Each bait is supplied with peel-off tape to secure baits in inconspicuous locations where cockroaches hide.

DIRECTIONS: For effective cockroach control, use all 12 baits at once. Baits must be placed with tape side facing down (label side up) in places where cockroaches are seen. This is usually in the kitchen and sometimes in the bathroom. Place baits at points of entry and travel routes which will include water and drain pipes, cracks and crevices, moist areas such as spaces around water pipes and tanks, surfaces behind and beneath cabinets and sinks, around appliances, garbage storage areas. Use all 12 baits per 15 square meters. Do not place baits in broad, open areas. Remove paper backing from double sided tape to affix baits to vertical or flat surfaces, avoiding wallpaper or pointed surfaces that may be damaged when the bait is replaced. Record the number of baits and the location to insure proper disposal after use. Cockroaches will begin eating the bait immediately and you should expect to see an improvement within a week. Replace used baits every 30 days to keep infestations from reoccurring.

CAUTION: May be harmful if swallowed. Keep out of reach of children. Place bait stations in areas not accessible to children and pets. Do not place baits in an area where, if dislodged, they may contaminate food, food preparation surfaces, utensils, dishes, aquariums, pet cages, etc. Do not contaminate water or foodstuffs or attempt to remove bait from container.

DISPOSAL: Wrap used containers and dispose of with household garbage.

FIRST AID: If content is swallowed, drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Chlorpyrifos is a cholinesterase inhibitor. Atropine is antidotal. Obtain medical attention immediately taking pesticide container with you.
