BOW-CHLOR is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of BOW-CHLOR in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS:

1. Maintain proper daily levels as determined by testing kit:

Free Available Chlorine.....1.0 - 3.0 ppm  
pH:.....7.4 - 7.8  
Total Alkalinity.....100 - 120 ppm  
Calcium Hardness:.....200 - 300 ppm

2. Superchlorinate pool water initially with 1 litre BOW-CHLOR per 10,000 litres of pool water.
3. For best results, superchlorinate at dusk.
4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of BOW-CHLOR PER 10,000 litres of pool water or as needed. NOTE: Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals.
5. Superchlorinate weekly with 1 litre per 10,000 litres if average daily temperature is 25'C to 32'C. Otherwise, superchlorinate every other week.
6. For visible algae superchlorinate with 2 litres per 10,000 litres of pool water. Heavy algae infestation may require dosages up to 3 L per 10,000 L. Wait at least 24 hours and vacuum pool when dead algae.
7. For wading pools, chlorinate daily to maintain chlorine residual of 3 - 5 ppm by adding 45 mL per 1000 L of pool water, or as needed.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

#### PRECAUTIONS:

- Keep out of reach of children.
- Dangerous gas formed when mixed with acid.
- Do not mix with any other chemical.
- Avoid contact with skin and eyes.
- Harmful if swallowed.
- Keep container closed and store in a cool location.
- Rinse container thoroughly before discarding.
- To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, give one or two glasses of milk and warm water. Call a physician IMMEDIATELY. Keep patient warm.

STORAGE: Use at once: stability maximum 6 months. Do not store in trunk of car for extended periods of time.
