USE AREAS: Restaurants, food plants, dairies, stables, and other areas with at least 170 (cu. metres) M³ of free flow air space where flies and mosquitoes are an annoyance. The automatic dispenser that activates the valve releases a metered dose of 55 mg of insecticide every 15 minutes. Each can contains enough product to protect an area of at least 170 (cu. metres) M³ of free flow air space, for up to 30 days.®
Not for use in meat processing plant

DIRECTIONS: Remove protective cap from top of can and insert can into special automatic dispenser. Place dispenser 2-3 metres above the floor at a point where air flow will carry the insecticide throughout the area.

PRECAUTIONS: Contents under pressure. Container may explode if heated. Do not expose to temperatures above 50°C. Do not use in presence of open flame or sparks. Do not puncture or incinerate. Do not contaminate food, feed, or water. Avoid contact with skin and inhalation of spray mist. Wash after using. Contents toxic to fish and birds. Do not install directly over polished, plastic or varnished surfaces. KEEP OUT OF REACH OF CHILDREN. Dispose of empty container with regular garbage.

FIRST AID: In case of contact with eyes or skin, flush with water. If irritation persists, seek medical attention. If accidentally swallowed, seek medical attention at once.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
