KAYTABS disinfects and protects pool water by effectively burning out organic matter, algae spores, colours and odors when used as directed.

Read all directions before using.

METHOD OF APPLICATION

Tablets may be used with any proper feeder that is totally free

from any trace of other type chlorines.

CAUTION: Avoid direct contact of tablets with vinyl pool liners or painted surfaces. DO NOT throw directly into pool. DO NOT mix different types of chlorine in the same container as there may be a hazardous chemical reaction.

POOL START-UP and SHOCK TREATMENT

1. If necessary, adjust pool water pH to between 7.2 and 7.6.
2. Shock pool water with SHOCK according to its label directions. Test pool water and, if necessary, repeat until a free chlorine residual of 4 ppm has been attained.
3. Fill tablet feeder with tablets and put into operation.
4. Allow chlorine residual to drop to 1.5 ppm before using pool.

EACH DAY

Chlorine demand varies with pool use and temperature. Check water with test kit for pH and chlorine residual each day. Maintain pH between 7.2 and 7.6 and chlorine residual at 1.0 to 1.5 ppm. Normally 2 tablets for each 10,000 litres of water is sufficient.

EVERY TWO WEEKS (Weekly in hot weather or after heavy pool use). To prevent eye irritation, strong chloramine odors, cloudy or discoloured water and to eliminate algae and accumulated organic matter, use 2 to 3 times normal daily addition or, for even faster results, use SHOCK according to its' label directions. Four hours later, check pH and, if necessary, adjust to between 7.2 and 7.6.

READ BEFORE USING

PRECAUTION: DANGEROUS GAS FORMED WHEN MIXED WITH ACID. NEVER MIX WITH ANY OTHER CHEMICAL OR MATERIAL OTHER THAN WATER AS FIRE OR EXPLOSION MAY RESULT. Moisture contamination may liberate irritating and hazardous chlorine gas. When not in use, keep container tightly closed and store in a cool, dry area.

Causes severe eye irritation. Avoid contact with eyes, skin and clothing. FIRST AID TREATMENT: Contains calcium hypochlorite. If swallowed, give one or two glasses of milk or warm water. Call physician immediately. Keep patient warm.

KEEP OUT OF REACH OF CHILDREN AND PETS.

DISPOSAL: This product is toxic to fish. Treated pool water should not be discharged into streams, ponds, lakes or any storm sewers. Do not re-use container - rinse thoroughly with water before disposal.
