#### GENERAL INFORMATION

##### Home Garden Tomato Use

NU-TOMATOTONE can be used as an overall, foliar spray to concentrate and accelerate tomato ripening. Apply NU-TOMATOTONE at the end of the growing season to hasten ripening of mature green tomatoes and allow harvesting of fruit before frost. NU-TOMATOTONE spray will be most effective on healthy plants. Harvest fruit at proper maturity, generally 14 to 21 days after treatment. Some defoliation or yellowing of foliage following treatment will be observed.

AMOUNT TO USE:

When treating several plants mix 4 ML of NU-TOMATOTONE in 1000 ML of water. When treating a large number of plants (10 to 15) mix 20 ML of NU-TOMATOTONE in 500 ML of water. Apply NU-TOMATOTONE with a clean hand sprayer. Thoroughly wet all leaves and fruit to the point of run-off.

CAUTION:

Harmful if swallowed. Avoid contact with skin, eyes or clothing. Do not inhale vapors. Avoid spray drift to nearby crops as this product may cause temporary modifications in plant growth. Do not contaminate water used for irrigation or domestic purposes. Do not reuse empty containers. Destroy in a safe place.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO THE BUYER

Seller's guarantee shall be limited to the items set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
