LIQUID MICROBICIDE

KT-825 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. KT-825 is a broad-spectrum liquid microbicide, that WILL NOT CAUSE FOAM.

DIRECTIONS FOR USE

Prior to the use of KT-825 in water cooling towers, systems should be cleaned to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 375 to 735 ml of KT-

825 per 10,000 litres of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 120 to 735 ml of KT-825 per 10,000 litres of water every 1 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

PRECAUTIONS

Keep out of reach of children

Harmful if swallowed. Workmen handling the product should wear rubber gloves and goggles and should avoid contact of the product with clothing or skin. After any exposure, wash promptly and thoroughly with an abrasive soap and cool water and finally with glycerin. Keep the drum closed when not in use. Do not reuse container.

FIRST AID AND TOXICOLOGY: If swallowed, call a physician immediately. Give patient doses of powdered charcoal immediately or all he can swallow of raw egg whites, milk, gruel, or flour and water. Then induce vomiting. In case of persistent irritation of the skin, obtain medical attention. If the product gets into the eyes, flood eyes immediately and thoroughly with cool water for 15-30 minutes. See a physician if any irritation persists.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

DISPOSAL

1. Rinse the emptied Container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and

the cleanup of spills contact Provincial Regulatory Agency of the Manufacturer.
