Later's

FUNGUS GNAT FLY - The Fungus Gnat Fly lays its eggs in the soil. Within a week the eggs hatch. The hatched larvae, which are white with black heads, crawl through the soil damaging the plant's roots. In sufficient numbers, the larvae weaken the plant which may die. There can be many generations in a year.

SPRINGTAILS - The tiny Springtail is sometimes mistaken for a flea because of its ability to jump. Some varieties feed on plants and as they love moisture many are found in basements and near drains.

DIRECTIONS:

Later's Tropical Soil Insecticide Dust is ready-to-use and controls insects such as Fungus Gnats (larvae) and

Springtails, that live in houseplant soil. Insects are visible on soil surface after watering.

Apply to cover soil surface and work into 3-5 cm. Give plant thorough watering. Repeat as necessary.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN AND PETS. Remove or cover all food and utensils before treatment. Avoid breathing dust. Keep away from food. Wash thoroughly after use, before eating, drinking, or smoking. Do not apply to animals.

FIRST AID: IF SWALLOWED, induce vomiting. To do so give 2 glasses of warm water to drink and insert finger or blunt object into mouth and touch back of victim's throat. Contact a doctor or poison control centre at once. Never give anything by mouth to an unconscious person. IF IN EYES, flush with water for 15 minutes and get medical attention. IF ON SKIN, wash with soap and water.

STORAGE: Keep product in original container. Store in a cool, dry place away from food.

DISPOSAL: Do not re-use empty container. Wrap container and discard in household garbage.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on this label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
