Mississauga, Ontario  
L4Z 2Z1

Three steps to a weed-free, healthy lawn:

1. Kill the weeds with WEED-NO-MORE.
2. Fertilize with Lawn Green.
3. If necessary, re-seed spaces where weeds killed. In most cases, grass will fill in naturally.

DIRECTIONS:

1. Mix 6 mL\* in each litre of water.

2. Spray on lawn at the rate of 16 litres mixture per 100 square meters. (For compressed air (tank-type) sprayers, use 12 mL/litre and apply 8 litres mixture per 100 square meters).
3. Spray weeds in late spring or early fall when they are actively growing. Repeat as necessary. Killing action takes up to 4 weeks.

\*5 mL = 1 teaspoon.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Do not inhale vapors or allow contact with skin. Do not apply on or allow spray to drift onto flowers, vegetables or ornamentals. Do not use sprayer for other purposes such as applying insecticides or fungicides. Do not apply to newly seeded lawns until 3rd mowing. Do not apply to bent grasses. Dispose of empty container in garbage.

FIRST AID: If in eyes, flush with clean water and obtain medical attention. If on skin, remove contaminated clothing and wash thoroughly. Obtain medical attention. If inhaled, move to fresh air, clean up, and rest. Obtain medical attention. If swallowed, give a large amount of water to rinse mouth and drink, and induce vomiting. Call a doctor or Poison Control Centre immediately.
