PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. CAUSES SKIN
IRRITATION, POTENTIAL SKIN SENSITIZER. Do not use in
nurseries or rooms where infants, ill or aged persons are
confined. Do not install directly above or within 3.7 meters

of any food handling or dispensing area. IN MEAT PACKING AND FOOD PROCESSING PLANTS, only spray when plant is not in operation. No exposed meat products, ingredients or packaging material to be left in room. Cover food handling equipment.

Any treatment surface that may contact meat food products or other food products should be washed and rinsed thoroughly with potable water after spraying and before re-use for food packaging. Do not spray over milk or milking equipment. Avoid contact with skin and inhalation of spray mist. Wash after using. Contents toxic to fish and birds. Do not contaminate food, feed, or water.

Physical or Chemical Hazards: CONTENTS UNDER PRESSURE. Container may explode if heated. Do not expose to temperatures above 50°C. Do not puncture or incinerate. Do not allow spray to contact plastic, painted or varnished surfaces.

FIRST AID: In case of contact with eyes or skin, flush with water. If irritation persists, seek medical attention. CONTAINS PETROLEUM DISTILLATES. If accidentally swallowed, do not induce vomiting and seek medical attention or call a Poison Control Centre at once.

DISPOSAL: When container is empty, press valve to release all pressure. Dispose of empty container in accordance with provincial requirements. For information on the disposal of unused, unwanted product, and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS FOR USE:

Clean Air purge II Big Shot contains a highly effective insecticide designed especially for use in Automatic Dispensers. The Dispenser activates the 70 mg metered valve every 15 minutes. Remove protective cap from top of can and insert can in special Automatic Dispenser. Place Dispenser 2-3 meters above floor at point where air circulation will carry particles throughout the area. Do not install directly over food or food packaging surfaces.

Usually the effectiveness of this product will be noticeable within one hour after the Dispenser is activated. If less than 24 hour control is required, the Dispenser should be set to start one hour before control is desired and run hour after control is no longer needed. One 232 g unit is designed to treat an area of 170 m³ of free flow air space for up to 30 days. One unit per 170m³ should be considered as an average depending on specific conditions (such as airflow rate, humidity and room temperature) at place of usage. Keep in mind that such factors as airflow rate, size of space treated, humidity and room temperature affect insect activity and control. As with any method of insect control, best results are achieved when sanitation and other prevention practices are followed.

FOR USE IN:

Food handling and food preparation area of restaurants and food processing plants and in stores, farms, dairies, barns, poultry houses, hotels, motels, supermarkets, food warehouses, hospitals, and nursing homes. Also for use in meat processing and packaging plants when not in operation.
