HYPOCELL SYSTEM MODEL MC 8P
MC 8P-S2

REGISTRATION NUMBER 20371
PEST CONTROL PRODUCTS ACT

MAX OUTPUT EQUIVALENT PER CELL
0.56 Kg/DAY HYPOCHLOROUS ACID

CAUTION: HYPOCELL SYSTEMS

SWITCH OUT IN LOW WATER FLOW CONDITIONS. DO NOT BYPASS
SAFETY SYSTEMS AS FLAMMABLE GASES MAY BUILD UP RESULTING IN
FIRE AND EXPLOSION.

MANUFACTURED BY:-

NATURE POOL (CANADA) INC.
#25,2133 ROYAL WINDSOR DR.,
MISSISSAUGA, ONT.
L5J 1K5
CANADA

HYPOCELL RESIDENTIAL BROCHURE

HYPOCELL MAKES SWIMMING PURE ENJOYMENT

The Hypocell system of water purification guarantee that your pool water is automatically kept free from bacteria and algae. By using household salt instead of concentrated chemicals such as Chlorine or Bromine, this electrolytic system promotes a healthy environment without the unpleasant smell and taste often associated with improper chemical purification.

WHAT IS IT?

A neat wall mounted electronic "box" controlling an electrolytic cell. This cell connects directly into your pool filtration system, giving you these advantages:

IT'S AUTOMATIC:

- your pool takes care of itself
- eliminates the need for daily pool maintenance
- maintains a constant level of protection against harmful bacteria
- automatically monitors itself

- programmable timer adjusts to your needs
- no expensive chemicals to buy
- pays for itself
- economical to run

IT'S SAFE:

- a small amount of common salt replaces concentrated Chlorine or Bromine
- no danger to children and adults from stored chemicals
- guards against sore eyes and allergic skin reactions caused by chloramines
- gives continuous protection against harmful bacteria
- produces a powerful and effective algaecide/bactericide

IT'S HEALTHY ENJOYMENT:

- sparkling clear water without effort
- no unpleasant taste or smell
- ideal for indoor and outdoor pools
- installation is quick, clean and easy
- no maintenance needed
- compact and attractive
- the water feels silky smooth

HYPOCELL IS THE HEALTHY NATURAL WAY TO PURIFY YOUR POOL OR WHIRLPOOL

In many residential pools, chemical are added haphazardly. Immediately after dosing, the concentration is too high for comfortable swimming. Before the next dose is added, the concentration often falls dangerously low giving inadequate protection against harmful bacteria.

Hypocell, however, continuously generates the purifying agent, thereby efficiently maintaining the level within the safe zone. Its electronic timing system allows you to set the Hypocell to meet your own needs. Its "Superboost" feature allows you to boost the output for parties, or to give your pool an extra sparkle.

INTERNATIONALLY RECOGNIZED

Hypocell is an international best seller, operating in 14 countries around the world. Current installations include major hotel chains, hospitals and government institutions, as well as numerous private pools, spas and whirlpools.

SAFETY FIRST

By installing a Hypocell unit, you make your home a safer place, particularly if you have young children in the house. By using household salt instead of chlorinating chemicals, Hypocell

eliminates the need to handle or store Chlorine or Bromine.

Hypocell has been exhaustively tested by an independent health laboratory which concluded: "The Hypocell system produces an extremely effective bactericide, at least as good as present forms of pool sanitation, but with a standard of safety hitherto unknown in the pool purification field".

FULL PROTECTION

Hypocell produces pure hypochlorous acid which destroys most bacteria in under 5 seconds without harmful or unpleasant side effects to swimmers. This is known as the "kill-time" and if it is too long, bacteria from one swimmer can be passed on to the other before purification has taken place. Hypocell's "kill-time" gives full protection.

HYPOCELL IS DESIGNED TO THE HIGHEST STANDARDS

The tough cell provides a continuous supply of pure hypochlorous acid. This is controlled by the advanced electronic console. The cell incorporates an automatic pressure cut-out to protect it in the event of low water flow. Warning lights on the console alert you to any significant change in the salinity of your pool water.

The Unit is compact and attractive. It is simple and clean to install in any existing or new pool system, and is easy to operate. It plugs directly into any convenient power outlet.

MAINTENANCE

Under normal pool operating conditions, no maintenance is required, ensuring long and trouble free service.

GUARANTEE

Hypocell is guaranteed against defective materials and workmanship for a period of one year from the date of purchase of the Unit, provided that the Unit has been installed, operated and maintained in accordance with the installation and operating instructions.
