USES: For general sanitation, disinfecting, bleaching use 30 mL of ATLANTIC - 12 per 5 L of water. For specific uses... in water treatment, sewage and waste treatment... ask your distributor for technical assistance.

FOR SANITARY SWIMMING & WADING POOL WATER: Use ATLANTIC-12 daily for maintaining sanitary pool water. Also use for SHOCK TREATMENT, and

OPENING/CLOSING your pool. ATLANTIC-12 is recommended for all types of pools.

C Does not damage or clog filters

C Effective in hard or soft water

C Ready to use; NO PREMIXING

DIRECTIONS FOR USE:

REGULAR TREATMENT Maintain recommended daily levels as determined by testing kit:

Free available chloride:	1.0 - 3.0 ppm
pH:	7.2 - 7.8
Total alkalinity:	100 - 120 ppm
Calcium Hardness:	200 - 300 ppm

1. Before adding ATLANTIC-12, test the pH and adjust to within the 7.2 to 7.8 range. Add acid if pH is high. Add soda ash if pH is low.
2. Chlorinate daily to maintain proper chlorine residual with 250 mL of ATLANTIC-12 per 10,000 L of pool water, or as needed.

NOTE: Hot weather, heavy pool usage, and rain may require higher dosage rates to maintain proper chlorine residuals.

OPENING NEW POOL: Superchlorinate (SHOCK) pool water by adding to the pool 1 L of ATLANTIC-12 per 10,000 L of pool water. For best results superchlorinate (SHOCK) at dusk.

OPENING/CLOSING POOL: For opening/closing pool, superchlorinate (SHOCK) pool water by adding 3 L of ATLANTIC-12 per 10,000 L of pool water. For best results superchlorinate (SHOCK) at dusk.

SHOCK TREATMENT: Superchlorinate (SHOCK) weekly with 1 L of ATLANTIC-12 per 10,000 L of pool water when average temperature is 25°C - 32°C. Otherwise, superchlorinate (SHOCK) every other week.

ALGAE CONTROL: For visible algae, superchlorinate (SHOCK) using 2 L of ATLANTIC-12 per 10,000 L of pool water. Heavy algae infestation may require dosages up to 3 L per 10,000 L. Vacuum pool when dead algae settles.

WADING POOLS: Chlorinate daily to maintain a chlorine residual of 3-

5 ppm by adding 45 mL of ATLANTIC-12 per 1,000 L of pool water, or as needed.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by adding stabilizer (cyanuric acid).

PRECAUTIONS:

Keep out of reach of children. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Avoid contact with skin and eyes. Harmful if swallowed. Keep container tightly capped and store upright in a cool location. Rinse container thoroughly before discarding. Use only as directed.

FIRST AID TREATMENT:

Contains Sodium Hypochlorite. If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or warm water. DO NOT INDUCE VOMITING. Call a physician or poison control centre IMMEDIATELY. Keep patient warm.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

RECYCLE BOTTLE WHERE FACILITIES EXIST

DISPOSAL

1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use, if the container is not returned to supplier.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

Store upright in a cool dark place

Product not affected by freezing
