KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 49.58 ml

Manufactured by: Bell Laboratories, Inc., 3699 Kinsman Blvd., Madison, WI 53704 USA
Tel: 608-241-0202

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN, PETS AND LIVESTOCK.

May be harmful or fatal if swallowed or absorbed through the skin. Rubber gloves must be worn when handling product and when disposing of dead rodents, unconsumed bait and empty containers. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash skin thoroughly with soap and water after handling. Wash contaminated clothing, separately from other laundry, with soap and water before reuse. **KEEP AWAY FROM FEED AND FOODSTUFFS.**

FIRST AID: **If in eyes,** flush with water for 15 minutes. **If on skin,** wash with soap and water. **If swallowed,** give patient one or two glasses of water and INDUCE VOMITING by touching back of throat with a finger or blunt object; repeat until vomit fluid is clear. Do not give anything by mouth to an unconscious person. For all cases of human ingestion, immediately notify a physician or poison control centre. If a pet or livestock poisoning is suspected, immediately contact a veterinarian. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Vitamin K₁ in the form of intramuscular or subcutaneous injections, or by oral ingestion are suggested remedial treatments for anticoagulant poisoning. The severity of the case measured by establishing prolonged prothrombin times (P.T.) will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Keep out of lakes, streams or ponds.

DIRECTIONS FOR USE: Use bait to control the Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*) and House mouse (*Mus musculus*) indoors and against the outside walls of buildings.

USE LIMITATIONS: Bait MUST either be placed in tamper-resistant bait stations or in locations not accessible to children, pets or livestock. DO NOT place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

SELECTION OF TREATMENT AREAS: Determine areas where rats and/or mice will most likely find and drink the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Remove any spoiled or contaminate bait promptly.

MIXING DIRECTIONS: Using scissors, cut one pouch where indicated and pour its contents into 1 liter of water. Mix LIQUA-TOX II and water thoroughly.

APPLICATION DIRECTIONS

RATS: Place 500 ml of diluted liquid bait in each dispenser. If infested area is large, or if rat population appears to be high, use dispensers at several locations. Space dispensers and refill them as needed to ensure that bait is exposed in all infested areas where it can be used without putting non-target organisms at risk.

HOUSE MICE: Place 250 ml of diluted liquid bait in suitably equipped bait stations. Place dispensers at intervals of 2.5 - 4 metres (8 - 12 feet) in all infested areas where bait can be used without putting non-target organisms at risk.

RATS/MICE: Replace contaminated or spoiled bait immediately. Dispose of unused or spoiled bait and dead rodents in accordance with local requirements. Continue placements as long as target species are being controlled by bait and non-target species are not at risk.

DISPOSAL: Do not reuse empty container. Dispose of empty container by placing in household garbage.

Rodent Disposal: Dispose of dead rodents in garbage or by burying.

STORAGE: Store in a cool, dry place away from other chemicals and food or feed. Store product not in use, in original container, in a secure location inaccessible to children and non-target animals.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
