Mississauga, Ontario L4Z 2Z1

Night feeding slugs and snails are attracted to the pellets and killed quickly. Soil moisture does not dissolve the pellets and as a result, they maintain their effectiveness longer than an ordinary bait.

DIRECTIONS:

1. Moisten soil before treatment.
2. Apply pellets to the bare soil at the rate of 375 grams per 100 m².
3. Apply in the late afternoon.

4. Ensure pellets are spread under low growing plants where slugs may hide.
5. For best results, bait in the spring after planting and at 3-week intervals or when slug damage first appears.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN, POULTRY AND OTHER DOMESTIC ANIMALS. Store in a cool place. Avoid exposure to high temperatures. Harmful if swallowed. Do not contaminate edible parts of food crops as residues may occur. Wash hands after use. Dogs are attracted to metaldehyde baits and poisoning may result.

FIRST AID INSTRUCTIONS:

If swallowed, induce vomiting. Call a doctor. In case of accidental ingestion of Slug Destroyer pellets by pets, treat as for acidosis.

DISPOSAL:

Dispose of empty container with household garbage.
