KEEP OUT OF REACH OF CHILDREN

DANGER! Corrosive to EYES

YORK CHEMICAL CORP.
3309 East Carpenter Fwy. Irving, Texas USA

PRECAUTIONS: Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location. Rinse container thoroughly before discarding. Do not reuse. For information on the disposal of unused, unwanted product and the clean up of spills, contact your municipality, Provincial Ministry of Environment or the regional office of Environment Canada.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact get medical attention. If swallowed, drink one glass of milk or water. Call a physician IMMEDIATELY.

DIRECTIONS FOR USE:

Weight per Tablet 24.5 g.

Tabex Bromine Tablets are an effective slow dissolving sanitizer and algaecide that perform well over a broad pH range.

WARNING: Direct tablet contact may cause bleaching of vinyl or painted pool surfaces.

Automatic feeding devices used with these tablets must be totally free from traces of other pool sanitizers to avoid the probability of an explosion!

1. Maintain recommended daily levels as determined by a testing kit:

Total Bromine Residual:	1.0 ppm - 3.0 ppm
pH:	7.2 - 7.8
Total Alkalinity:	100 ppm - 150 ppm
Calcium Hardness:	200 ppm - 300 ppm

2. Read instructions peculiar to your brominator. Fill the brominator with tablets and adjust flow rate according to manufacturer's recommendations to maintain recommended bromine residual. Approximate daily usage is 25 g or 1 - 2 Tabex Bromine Tablets per 10,000 L of pool water. Add tablets to the brominator weekly or as required.

NOTE: Hot weather, heavy pool usage and rain may require higher usage rates to maintain proper bromine residuals.

3. To keep pool water sparkling and inviting it may be necessary to shock pool water using a non-chlorine shock chemical. Follow label instruction of the non-chlorine shock product utilized.
