INDOOR APPLICATIONS: For initial clean out of infestation of **Cockroaches, Ants, Spiders, Silverfish, Crickets, Boxelder Bugs** and **Clover Mites:** Dilute 1 part concentrate in 4 parts water. Apply as a coarse droplet spray using approximately 700 ml per 10 square meters. Spray thoroughly all surfaces where these insects are usually found including walls, baseboard moldings, doors, cabinets, shelves, sinks and pipes, with special attention to cracks and crevices, niches, dark corners, drains and similar hiding places. Treat ant trails, nests and runs. When possible spray insects directly. Repeat treatment using a dilution of 1 part of concentrate plus 9 parts of water at the same rate of application after an interval of one month or when reinfestation occurs.

OUTDOOR APPLICATIONS: On the following crops to control the insects named, use 0.85 ml to 2.5 ml of concentrate per liter of water to treat approximately 10 sq meters of garden. Coverage of upper and lower leaf surfaces is essential for good control.
