Net Weight 15kg (33lbs)

This J.E. Mondou® Scented Clumping Cat Litter contains a special ANTI-BACTERIAL agent which fights germs for an even cleaner litter box.

- 100% Bentonite clay for faster & firmer clumping action
- More economical - lasts 4 times as long as conventional litter
- Convenient to use, minimum tracking & a special new low dust formula
- Cat Friendly & environmentally friendly

DIRECTIONS:

1. Fill a clean litter box with 8 to 10 cm (3 to 4 inches) of J.E. Mondou® Scented Cat Litter with ANTI-BACTERIAL agent. Do not mix with other litters. No liner is required.
2. Granules rapidly absorb urine, clumping it into a solid ball so it doesn't seep to the bottom of the litter box. Daily, sift through the litter box with a slotted scoop and scoop out the clumped balls and solid waste. Remaining granules are clean and fresh, and need not be discarded.

CAUTION: DO NOT FLUSH LITTER DOWN TOILET OR SEPTIC TANK SYSTEM.

3. Refill litter box with J.E. Mondou® Scented Clumping ANTI-BACTERIAL cat litter to maintain 8 to 10 cm (3 to 4 inches) depth.

PRECAUTIONS: Wash hands thoroughly after preparing or cleaning the litter box. Pregnant or nursing women and people with suppressed immune system should note that a parasite found in cat feces can cause toxoplasmosis. They should exercise caution and consult a physician before handling a litter box.

DISPOSAL: Dispose of used or unused product with household garbage.

WARNING:

Do not use this product as a traction aid. It becomes slippery when wet.
Keep the litter away from food preparation.

J.E. Mondou® Scented Clumping Cat Litter is non-toxic.

INGREDIENTS: Natural Clay with Anti-Bacterial Agent

STORAGE: Store in dry place.

Packaged in Canada
