GUARANTEE: Chlorthal 5%

READ THE LABEL BEFORE USING

500 g

WILSON LABORATORIES INC.
DUNDAS, ONTARIO L9H 3H3

DIRECTIONS FOR USE: This product kills germinating seeds of crabgrass and other grasses, also the seeds of common chickweed, lambsquarters and purslane. Proper application may give control up to four months. Growing grasses and weeds are not controlled. The results on muck soil are uncertain.

LAWNS: Apply 35 g per square metre (this package per 14 square metres), in early spring between melting of snow and mid-May. (When Forsythia blooms drop). Spread evenly over area when grass is dry. Water thoroughly within 3 to 4 days. Do not apply on newly seeded lawn until after first mowing. (September is the best time for seeding lawns).

FLOWERS, SHRUBS, ROCK GARDENS: Apply at any time after growing weeds and grasses are removed; early spring is preferred as seeds have not yet germinated. Use 31 g per square metre (this package per 16 square metres). Your ornamental plants are not harmed, provided their foliage is dry when applying, but do NOT apply on

carnation, celosia, geum, pansy, phlox, snapdragon, sweet William and Vinca minor, as injury may be caused. Water area within 3 to 4 days.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Avoid contact with eyes and skin. Wash after handling. Do not feed grass clippings. Store in dry place away from food, feed and seed. Dispose of empty container as garbage.

FIRST AID: If swallowed induce vomiting; if in eyes flush with water for 15 minutes. Get medical attention at once.
