DIRECTIONS FOR USE

This bait is to be used only with mechanical Burrow Builder. To

build a proper burrow the soil must be damp and the Burrow Builder must be scoured. Probe gopher runways with a broomstick or iron bar to determine depth of the gopher runway. Set machine to the same depth. Make artificial runway 7.00 m to 10.00 m apart encompassing the total infested area and then cross the ends. One kg to 2.25 of bait will treat one hectare.

PRECAUTIONS : Do not contaminate feed and foodstuffs. Keep away from children and domestic animals. When empty, all containers and all grain fragments must be burned or buried deeply. May be fatal if swallowed. Baits should be placed in areas inaccessible to children, pets, wildlife. Treated seeds exposed on soil surface may be hazardous to birds and other wildlife. All placements of bait must be under existing or introduced cover of brush or weeds.

FIRST AID INSTRUCTIONS : If less than ten minutes passed since the poison was taken, give a tablespoonful of salt in a glass of warm water. Have victim lie down in a quiet, darkened room and keep him warm. Call a physician immediately!

DISPOSAL : For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Conservation and Protection, Environment Canada.
