BLAST

CHLORINE SHOCK

CHLORINATING GRANULES

CONTROLS BACTERIA AND ALGAE IN SWIMMING POOL WATERS

DANGER: DO NOT MIX WITH OTHER CHLORINES AND CHEMICALS

DOMESTIC

GUARANTEE:

CALCIUM HYPOCHLORITE..... 65%

AVAILABLE CHLORINE CONTENT....65%

WARNING

POISON

CORROSIVE

READ THE LABEL BEFORE USING

REG. NO. 21531 P.C.P. ACT

NET CONTENTS

7 kg (15.4 lb)

Atlantic Chemical & Supply Ltd.  
Bedford, Nova Scotia B4B 1J3

DIRECTIONS FOR USE

1. Maintain recommended daily levels as determined by testing kit.  
Free available chlorine: 1.0 - 3.0 ppm  
pH: 7.2 - 7.8

Total alkalinity: 80 - 120 ppm  
Calcium hardness: 200 - 300 ppm

2. To minimize bleaching of vinyl liners, predissolve required amount of BLAST in a plastic pail with concentration not exceeding 1 kg per 10 litres of water. Always add chemical to water NEVER water to chemical. Broadcast resulting slurry directly to pool water.
3. Initially, superchlorinate pool water with 150 g of BLAST per 10,000 litres of pool water. For best results superchlorinate at dusk.
4. Maintain proper chlorine residual by broadcasting daily over the pool's surface, 30 g of BLAST per 10,000 L of pool water, or as needed.

NOTE: Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals.

5. Superchlorinate weekly using 150 g per 10,000 L when average daily temperature is 25°C - 32°C. Otherwise, superchlorinate every other week.
6. For visible algae superchlorinate using 350 g of BLAST per 10,000 L of pool water. Heavy algae infestation may require dosages up to 500 g per 10,000 L. Vacuum pool to remove dead algae.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of stabilizer (Cyanuric Acid).

#### PRECAUTIONS

- Keep out of reach of children.
- Strong oxidizing agent. May cause fire or explosion if contaminated.
- Dangerous gas formed when mixed with acid.
- Do not mix with any other chemical.
- Avoid contact with skin and eyes.
- Harmful or fatal if swallowed.
- Keep container closed and store in a cool, dry location.
- Rinse container thoroughly before discarding. Do not reuse.
- To dispose of chemical, flush into sewer with large quantities of water.

#### FIRST AID

If splashed in eyes or on skin, flush thoroughly with water for

15 minutes. For eye contact, get medical attention. If swallowed, drink 2 or 3 glasses of milk or water. Call a physician IMMEDIATELY.

CALCIUM HYPOCHLORITE HYDRATED  
CLASS 5.1
