LOT:

CHEMIX (1975) INC.
8425 Grenache
Anjou, Quebec
H1J 1C7

At 1:128 or 8 mL/L

The broad spectrum of GERMITOL 128 has been found effective against the following organisms:

Pseudomonas aeruginosa	Staphylococcus aureus
Salmonella cholerasuis	Escherichia coli
Streptococcus pyogenes	Enterobacter aerogenes
Salmonella schottmuelleri	Streptococcus faecalis
Shigella dysenteriae	Brevibacterium ammoniagenes
Salmonella typhi	Influenza A/Brazil
Trycophyton mentagrophytes (pied d'athète/athlete's foot)	

GERMITOL 128 is a "one step" cleaner-disinfectant-sanitizer-fungicide-mildewstat-virucide and deodorizer. No rinse formulation. For hospitals, institutions, industries and sporting clubs. Use on walls, floors, table tops and other surfaces.

USE DILUTION

Disinfection, virucide, fungicide, mildewstat and cleaning: To disinfect hard, non-porous surfaces, 1 part in 128 parts of water, or 8 mL per liter dilution. With a sponge or a cloth, clean the surface and allow to remain wet for 10 minutes. Let air dry. Sanitization - non-food contact surfaces (such as floors, walls, tables, etc): To sanitize non-porous, non-food contact surfaces, 1 part for 660 parts of water or 1.5 mL per

liter dilution. Allow to remain wet for 60 seconds. Let air dry. At this level, GERMITOL 128 is an effective sanitizer against Staphylococcus aureus and Klebsiella pneumonia on hard non-porous environmental surfaces. GERMITOL 128 is an effective sanitizer when diluted in water up to 400 ppm hardness (CaCO₃) and in presence of organic soil (5% blood serum). Prepare a fresh solution for each use.

Instructions for cleaning and decontaminating against H.I.V.-1 on surfaces and objects soiled with blood fluids: GERMITOL 128 is effective against H.I.V.-1 (Human Immunodeficiency Virus).
Personnal protection: When handling items soiled with blood or body fluids, wear disposable latex gloves, gowns, masks and eyes covering. Cleaning procedure: Thoroughly clean blood and body fluids from surfaces before applying GERMITOL 128. Contact time: To kill H.I.V.-1 apply GERMITOL 128 at 8 mL per liter of water and allow surface to remain wet for 10 minutes. Disposal of infectious materials: Blood, body fluids, cleaning materials and clothing should be autoclaved and disposed of according to provincial and local regulation of infectious waste disposal.

PRECAUTIONS:

Keep out of reach of children. Danger: corrosive to eyes. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

TOXICOLOGICAL INFORMATION:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites,

gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

STORAGE AND DISPOSAL:

Rinse the emptied container thoroughly and add the rinsings to treatment site. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning. Dispose the container in accordance with provincial requirements. For information on the disposed, unwanted product and the cleanup or spills contact the regional office of Environment Canada. For small spills, recover free liquid, soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA.
