PRECAUTIONS:

DANGER - CORROSIVE TO EYES AND CAUSES SKIN BURNS MAY CAUSE ALLERGIC SKIN REACTION MAY BE HARMFUL IF INHALED MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH SKIN

Do not get in eyes, on skin, on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Do not take internally. Wash thoroughly after handling. This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams,

ponds or public water. Do not contaminate water by cleaning or equipment or disposal or waters. Apply this product only as specified on this label.

STORAGE: Do not contaminate water, food or feed by storage or disposal. Open dumping prohibited. If plastic, do not reuse empty container.

DISPOSAL:

- 1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
- 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
- 3. Dispose of the container in accordance with provincial requirements.
- 4. For information on the disposal of unused, unwanted product and the cleanup of spills contact the regional office of Environment Canada.
- 5. For small spills. Recover free liquid. Soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA AS IN #4.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that conditions.

DIRECTIONS FOR USE:

Castrol Conditioner 101 is recommended for the control of bacteria and fungi in soluble and emulsifiable type aqueous metalworking fluids such as emulsified petroleum oils, and formulations containing alcoholic fatty acid, sulfonated red oil, or naphthalene sulfonate. These fluids are usually prepared by diluting the product concentrates 1:40 to 1:60 with water.

For the maintenance of a non-fouled system, use Castrol Conditioner 101 at 22 ml per 100 L of emulsion every 4 weeks or 22 - 110 Ml per 100 L of emulsion every 8 - 12 weeks. For a noticeably fouled system, use an initial dose of 48 - 110 Ml per

100 L of emulsion to be followed by subsequent maintenance dosages depending upon the treatment interval noted above.

A higher dosage range and/or increased frequency of treatment may be required depending upon rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc...

The preservative should be dispensed into the use dilution of the metalworking fluid using a metered pump. Castrol Conditioner 101 weighs 1.01 kg per litre.

FIRST AID: Do NOT induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution or if these are available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

IF INHALED: Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call a physician.

IF ON SKIN: Remove contaminated clothing immediately. Wash skin with large quantities of water.

IF IN EYES: Flush with plenty of water for at least 15 minutes. Call a physician.

TOXICOLOGY: Probable mucosal damage following ingestion may contraindicate gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

DETAILED PROCEDURES FOR TREATMENT SHOULD BE AVAILABLE THROUGH POISON CONTROL CENTERS.
