STABILIZED CHLORINE TABLETS

WARNING

Direct Tablet Contact May Cause Bleaching of Vinyl or Painted Pool Surfaces. Automatic Feeding Devices Employing These Tablets Must be Totally Free from Traces of other Pool Sanitizers To Avoid the Probability of an Explosion.

1. Maintain recommended daily levels as determined by testing kit.

Free available chlorine: 1.0 - 3.0 ppm  
pH: 7.2 - 7.8  
Total Alkalinity: 100 - 120 ppm  
Calcium Hardness: 200 - 300 ppm

2. For outdoor pools, chlorine residuals can be protected from destruction by the sun's rays by adding 300 g of stabilizer (cyanuric acid) per 10,000 L of pool water to yield the required initial concentration of 30 ppm.
3. If using an automatic chlorinator, fill the chamber(s) with tablets and adjust flow rate, according to manufacturer's recommendations, to maintain proper chlorine residual. Adding tablets to the pool's skimmer basket is an alternative chlorine feed method. Daily usage should approximate 25 g of Stabilized Chlorine Tablets per 10,000 L of pool water.  
NOTE: Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals.
4. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.
5. Stabilized Chlorine Tablets contains stabilizer which can accumulate in pool water. Keep stabilizer within the range of 30 -100 ppm by dilution with fresh water.

PRECAUTIONS:

\*Keep out of reach of children. \*Dangerous gas formed when mixed with acid. \*Do not mix with any other chemical. \*Strong oxidizing agent. \*May cause fire or explosion if contaminated. \*Avoid contact with skin and eyes. \*Harmful if swallowed. \*Keep container closed and in a cool, dry location. \*Rinse container thoroughly before discarding. Do not reuse.

For information on the disposal of unused, unwanted product and on the cleanup of spills, contact your municipality, provincial Ministry of Environment or the regional office of Environment Canada.

FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call physician or poison control centre IMMEDIATELY.
