REG.NO. 23242 PCP ACT

READ THE LABEL BEFORE USING

CCL INDUSTRIES INC.  
105 GORDON BAKER ROAD  
WILLOWDALE, ONTARIO  
M2H 3P8

CONTAINER CAN BE HELD IN ANY POSITION, EVEN UPSIDE DOWN TO SPRAY INSECTS IN THE MOST DIFFICULT TO REACH AREAS.

KILLS HORNETS, WASPS, BEES and other stinging insects. Best results are obtained when applications are made in early morning or evening when insects are at rest. STAND WELL AWAY FROM NEST, then spray directly into opening in short 2-3 second blasts so that the spray contacts inside nest entrance. If unable to locate nest, a heavy(contact & residual) spray around and into the openings where insects gain entrance will eventually eliminate

the pests. Insects hit by spray or having contacted the sprayed surface will die soon after.

KILLS GARDEN PESTS: Kills Tent Caterpillars and Pine Sawflies on deciduous and evergreen ornamentals.

DIRECTIONS: The spray will reach from 6 to 8 metres so you will now be able to reach the insects high in your eaves, ceilings, or trees. The best time to spray is on a calm day so the wind does not affect the jet spray from reaching the pests.

PRECAUTION: Contents under pressure. Do not heat, puncture or incinerate container. KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with eyes, skin, or clothing. DO NOT USE ON HUMANS, PLANTS, OR ANIMALS. DO NOT USE AS A SPACE SPRAY. Do not use in areas where food is handled, prepared or stored. May cause skin and/or eye irritation. Product is very toxic to fish. Do not contaminate water by improper use or disposal.

FIRST AID TREATMENT: If swallowed, do not induce vomiting. Call physician immediately. Chlorpyrifos is a cholinesterase inhibitor. Atropine is antidotal. In case of contact with skin, wash with soap and water. If in eyes, flush with water for 15 minutes, get medical attention.

DISPOSAL: When container is empty, wrap and dispose in household garbage.
