DIRECTIONS FOR USE : Corn oil is a superior type agricultural spray oil specially formulated with a surfactant to be used in combination with atrazine and water. The mixture of atrazine in this oil-water emulsion greatly improves its post emergent activity on quackgrass and other grass species.

USE PRECAUTIONS : Caution is recommended when spray is applied under very hot (dry), humid conditions, cold weather, frost or under other conditions which may enhance the activity of the herbicide mixture. Note that the risk of damage to other vegetation from spray drift is increased with the use of Atrazine in oil-water emulsions. Do not add any other herbicides or hormone type weed killers such as 2,4-D, 2,4-DB, MCPA, MCPB, or Dicamba.

SEEDLING WEEDS AND ANNUAL GRASSES : For increased activity and to

extend the period of application of Atrazine, apply 1.1-2.25 kg (active) Atrazine post-emergence per hectare when the broadleaf weeds are 5-10 cm high and annual grasses are at the 1-3 leaf stage. Add the Atrazine to the oil-water emulsion containing 15 L of corn oil in 150-300 L of water per hectare.

MIXING INSTRUCTIONS : Fill the spray tank half full with water, add the desired amount of Atrazine and continue filling. Add corn oil last. After filling, continue agitation.

Caution : Avoid violent agitation of the materials in the spray tank. Excessive agitation may produce an invert emulsion causing coagulation and setting of suspended materials.

WARNING : KEEP OUT OF REACH OF CHILDREN : Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Handle and apply only as directed and at recommended rates. Do not apply or allow to drift to areas occupied by plants, other than those being sprayed, or unprotected humans and animals. Do not contaminate water supplies, irrigation ditches, ponds, lakes or streams.

FIRST AID : This product contains a petroleum distillate. If swallowed, DO NOT INDUCE VOMITING. Get medical attention immediately. If patient is unconscious, give air. If in eyes, flush with plenty of water for 15 minutes and get medical attention. In case of skin contact, remove contaminated clothing and wash thoroughly with soap and water.

STORAGE AND DISPOSAL : Keep container tightly closed and DO NOT allow water to be introduced to contents or container. Do not store at temperatures below 0°C. Shake well if stored for one year or longer. To dispose of empty container, puncture and bury 50 cm deep and away from water supplies.

NOTICE TO USER : This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER : Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
