TEL.: (416) 746-4353

FAX.: (416) 746-4354

ORRIS-CHLOR is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of ORRIS-CHLOR in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS

1. Maintain recommended daily level as determined by testing kit:

Free Available Chlorine .....	1.0 - 3.0 ppm
pH .....	7.2 - 7.8
Total Alkalinity .....	100 - 120 ppm
Calcium Hardness .....	200 - 300 ppm

2. Superchlorinate pool water initially with 1 litre ORRIS-CHLOR per 10,000 litres of pool water.
3. For best results superchlorinate at dusk.
4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of ORRIS-CHLOR per 10,000 litres of pool water, or as needed.

NOTE: Hot weather, heavy pool usage and rain, may require higher dosage rates to maintain proper chlorine residuals.

5. Superchlorinate weekly with 1 litre per 10,000 litres when average daily temperature is 25'C - 32'C. Otherwise, superchlorinate every other week.
6. For visible algae, superchlorinate with 2 L per 10,000 litres of pool water. Heavy algae infestation may require dosages up to 3 L per 10,000 L. Wait at least 24 hours and vacuum pool when dead algae settles.
7. For wading pools, chlorinate daily to maintain chlorine residual at 3-5 ppm by adding 45 mL per 1,000 L of pool water, or as needed.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

#### PRECAUTIONS

- \* Keep out of reach of children.
- \* Dangerous gas formed when mixed with acid.
- \* Do not mix with any other chemical.
- \* Avoid contact with skin and eyes.
- \* Harmful if swallowed.
- \* Keep container tightly capped and store upright in a cool location.
- \* Rinse container thoroughly before discarding.
- \* To dispose of chemical, flush into sewer with large quantities of water.

#### FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or warm water. Call a physician IMMEDIATELY. Keep patient warm.

#### STORAGE:

Use at once - stability maximum 6 months. Do not store in trunk of car for extended periods of time.
