Pro-Con CLEAR

DISINFECTANT/SANITIZER
PRODUCTION CREW CHEMICALS

1100 Central Industrial Drive
ST. LOUIS, MO.
63110
U.S.A.

This product has been formulated to aid in the reduction of cross-contamination in institutions, schools and hospitals. This formulation is a one-step disinfectant cleaner that is effective against a broad spectrum of bacteria, is virucidal, fungicidal and will prevent the growth of mold and mildew and their odors when used as directed. This product is an effective one-step sanitizer-cleaner for use on non-food contact surfaces. When used as directed, this product will deodorize surfaces in toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas and other places where bacterial growth can cause malodors.

DIRECTIONS FOR USE

This product is a proven "one-step" cleaner-disinfectant-sanitizer-fungicide-mildewstat-virucide in the presence of moderate amounts of organic soil. Apply this disinfectant to walls, floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sinks and bedframes with a cloth, or mop so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when use solution becomes visibly dirty.

DISINFECTION - To disinfect hard, non-porous surfaces, add 17 mL/L of water. Treated surfaces must remain wet for 10 minutes. At this use level, this product is also virucidal, fungicidal and mildewstatic. At 9 mL/L this product will disinfect hard non-porous surfaces in schools, industry and non-medical institutions.

SANITIZING - To sanitize porous or non-porous, non-food contact surfaces, add 5 mL/L of water. Treated surfaces must remain wet for 60 seconds.

For hospitals and nursing homes, add 17 mL/L of water. The broad spectrum activity of this disinfectant has been evaluated in the presence of 5% serum and found to be effective against the following organisms by the AOAC Use-Dilution test:

Pseudomonas aeruginosa - *Salmonella choleraesuis* - *Serratia marcescens* - *Enterobacter ammoniagenes* - *Staphylococcus faecalis* - *Brevibacterium ammoniagenes* - *Staphylococcus aureus* - *Escherichia coli* - *Klebsiella pneumoniae* - *Salmonella*

schottmuelleri - Shigella dysenteriae

AOAC Fungicidal Test: This product at 9 mL/L is an effective fungicide against Trichophyton mentagrophytes (the athlete's foot fungus) when used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas, exercise facilities, etc.

Mold and Mildew Control: At 4 mL/L this product will effectively inhibit the growth of mold and mildew and the odors caused by them when applied to hard, non-porous surfaces (as indicated in general instructions above). Allow to dry on surface and repeat when mildew growth returns.

Virucidal Performance: At 9 mL/L use-level this product was evaluated in the presence of 5% serum and found to be effective against the Influenza A/Brazil Virus on inanimate non-porous environmental surfaces.

For schools, non-medical institutional and industrial uses: At 9 mL/L of water, this product delivers excellent cleaning and germicidal effectiveness. It is effective against Staphylococcus aureus, Salmonella choleraesuis and Escherichia coli. The same AOAC tests used above to confirm suitable performance for hospitals were used.

SANITIZING - Non-Food contact Surfaces (such as floors, walls, tables, etc.): At 5 mL/L use-level, this product is an effective sanitizer against Staphylococcus aureus and Klebsiella pneumoniae in the presence of 5% serum on porous and non-porous environmental surfaces.

PRECAUTIONARY STATEMENTS:

KEEP OUT OF REACH OF CHILDREN.

DANGER: Corrosive to eyes. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

TOXICOLOGICAL INFORMATION:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Dispose of the container in accordance with provincial requirements.
4. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Environment Canada.
5. For small spills. Recover free liquid. Soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA AS IN #4.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
