ALL PURPOSE FOR BUILDING INTERIORS, NURSERIES, GROUNDS, GARDENS
AND AIRPLANES.

DIRECTIONS: SHAKE BEFORE USING.

To spray: Hold container upright. Point valve opening away from
face and press button.

TO KILL FLYING INSECTS: FLIES, MOSQUITOES, FLYING MOTHS, GNATS, WASPS. With Bolt Airborne there is no need to spray directly at flying insects - the mist in the air will kill them. Close all doors and windows. Spray up into the air with a sweeping motion, keeping about 1 meter from interior walls, fabrics, furniture and plants. Keep room closed 15 minutes. About 10 seconds of spraying clears 28.3 cubic meters. Ventilate the area after treatment is complete.

TO KILL CRAWLING INSECTS: ROACHES, SILVERFISH, CRICKETS. Spray hiding places such as baseboards and floor boards, moist places, openings around sinks, drains, and pipes, behind bookcases, cabinets and other storage areas hitting as many insects as possible. Repeat as needed.

TO KILL ANTS: Spray trails, hills around windows and sills and openings around pipes and baseboards where ants crawl, hitting as many as possible. TO KILL SPIDERS, CENTIPEDES, SOWBUGS: Spray webs and places where these pests crawl. Hit as many as possible. Repeat as needed.

TO KILL CARPET BEETLES: Hit these bugs directly with spray on sections of floor, baseboards, shelves and carpets. Repeat spraying at frequent intervals.

TO KILL BEDBUGS: Spray baseboards, moldings, floor boards. Spray mattresses, particularly around seams and tufts. Take beds apart and spray into all joints. Repeat spraying at frequent intervals.

TO KILL FLEAS: Spray floors, floor coverings and sleeping quarters of pet. Repeat spraying as often as necessary. Do not spray pets.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Never puncture or throw container into fire. Never set container on stove, radiators or place where temperature will exceed 49 deg. C. which may cause it to burst. Remove pets, birds, and cover fish aquariums before spraying. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation. Do not remain in treated areas. Ventilate the area after treatment is completed. Keep spray in constant motion at least 1 meter away from walls,

fabrics, furniture, floor, plastics, etc. Spraying closer may cause stains or may damage certain floors or plastics. In airplanes, store in pressurized cabins only and use only when airplane is stationary on the ground and empty of passengers and crew.

DISPOSAL: When container is empty, press valve to release all pressure. Dispose of empty container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.
