Mississauga, Ontario
L5N 1W1

Sandoz Agro Insect and Mite Houseplant Mist offers unique
advantages in a new combination of insect growth regulator
(ALTOSID(R)), miticide (PENTAC(R)), and synthetic pyrethroid
(RESMETHRIN). The insect growth regulator, a member of a new
class of insect control agents, gives long term control of
insects. The miticide is active on eggs as well as all other
stages of mite development. The pyrethroid provides rapid

knockdown of insects and adult mites. For plants which are normally misted, this new water-based formulation provides the moisture required by the leaves on the day of use.

DIRECTIONS FOR USE

This control product is to be used only in accordance with the directions on this label. See accompanying plant list.

INSTRUCTIONS FOR USE

When aphids, whiteflies, spider mites, mealybugs, or scales appear, mist twice, 7 days apart. Repeat treatment if reinfestation occurs. Mist newly acquired plants twice, 7 days apart.

1. SHAKE WELL BEFORE USING.
2. Direct applicator toward plant at a distance of 25 to 35 cm.
3. Apply a fine mist by depressing plunger quickly and firmly.
4. Mist for complete coverage of all plant surfaces, including undersides of leaves; minimize run-off or drip.

PRECAUTIONS

1. KEEP OUT OF REACH OF CHILDREN.
2. Protect fabrics and household furnishings.
3. Avoid misting plants in direct sunlight or when foliage is wet.
4. Do not mist plants grown for human consumption or contaminate food or feed.
5. Do not mist near aquaria or terraria containing cold-blooded pets (fish, amphibians, reptiles).

FIRST AID

HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS.

CAUTION: Avoid contact with eyes. If eye contact occurs immediately flush eyes with plenty of water. Get medical attention if irritation persists.

STORAGE AND DISPOSAL

1. Protect from freezing or extreme heat.
2. Do not reuse empty container.
3. Wrap empty container and put in trash collection.

NOTICE TO BUYER Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

EFFECTS ON HOUSEPLANTS Sandoz Agro Insect and Mite Houseplant Mist offers unique advantages in a new combination of insect growth regulator (ALTOSID(R)), miticide (PENTAC(R)), and synthetic pyrethroid (RESMETHRIN). The insect growth regulator, a

member of a new class of insect control agents, gives long term control of insects. The miticide is principally active on eggs as well as all other stages of mite development. The pyrethroid provides rapid knockdown of insects and adult mites. For plants which are normally misted, this new water-based formulation provides the moisture required by the leaves on the day of use.

Use as directed to control the indicated common pests. Plants listed can be affected by a large variety of insect species. This product has been tested against those of most common occurrence. Treat only the plants listed on the label.

This product can cause damage to open blossoms. Plants in poor condition may be more susceptible to damage when treated with any chemical.

LIST:

Begonia spp.	Fibrous rooted and tuberous
Brassia actinophylla	Schefflera (some pitting of foliage may occur)
Chamaedorea elegans	Neanthe bella palm (dwarf palm)
Chrysalidocarpus lutescens	Areca palm
