KILLS RATS

RODENTS CONTROLLED: This product controls Norway rat (*Rattus norvegicus*), and Roof rats (*Rattus rattus*). For controlling rats resistant to Warfarin and Pindone anticoagulant rodenticides use MAKI RAT AND MOUSE MEAL BAIT at 0.005% level.

AREAS OF USE

PROCESSING PLANTS (FEED AND FOOD): Only in the following areas:
NON-FOOD (FEED) AREAS: These are areas where food, feed, food and feed handling equipment and food and feed packaging materials are NEVER open or exposed. These areas include but are not limited to, boiler rooms, lavatories, locker rooms, machine

shops, mop closets, offices, vestibules.

OUTDOOR AREAS: These include but are not limited to loading areas, and garbage areas. Special precautions may be necessary near air intakes.

PROCESSING PLANTS (NON-FOOD): They include all commercial, manufacturing or industrial premises where there are no feeds, foods or packaging materials. BUILDINGS (OUTDOOR SURFACES): These include chimneys, cornices, ledges, peaks, rooves, window sills, gutters, eaves, etc. BUILDINGS: These consist of dwellings, farm buildings, processing plants, warehouses, etc. STORAGE AREAS (NON FOOD): These consist of all storage where no food is found. They include, but are not limited to, warehouses, and stores other than grocery stores.

GENERAL BAIT PLACEMENT DIRECTIONS: For control of rats: Place bait stations near living and feeding areas and water supplies. Place baits behind boards next to wall, in rat holes, between walls or other protected areas. Replace baits that are contaminated, spoiled or not fresh. Replenish bait supply as long as there is evidence of rodent population.

Protect bait against access of children, pets, livestock, and wildlife, preferably by using bait stations or tamper proof boxes.

FOR RATS: Each station should contain at least 120 g of bait. Maintain constant supply of bait at stations for at least 10 days.

DISPOSAL: Recover dead rats and mice and dispose of properly in garbage. Do not handle dead rodents with bare hands.

PRECAUTIONS

Harmful if swallowed.

This product can be absorbed through skin, so it should be handled with gloves. Keep away from humans, domestic animals and pets.

This product is toxic to wildlife. The use of anticoagulant formulations can present a significant hazard to predatory mammals and birds through secondary poisoning.

Do not contaminate water by cleaning equipment or disposal of waste.

Do not re-use empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

FIRST AID INSTRUCTIONS Do not get in eyes, on skin, or on

clothing. In case of contact, flush with water for 15 minutes. In case of ingestion, intravenous and oral administration of Vitamin K1 combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin. Call a physician immediately.

TOXICOLOGICAL INFORMATION: If swallowed by humans, domestic animals, or pets, this material may reduce the clotting ability of blood and cause bleeding.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
