BOL'S POOL BRIGHT is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of BOL'S POOL BRIGHT in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS FOR USE:

1. Maintain proper daily levels as determined by testing kit:

Chlorine:	1.0 - 3.0 ppm
pH:	7.4 - 7.6
Total Alkalinity:	100 - 120 ppm
Calcium Hardness:	200 - 300 ppm

2. Superchlorinate pool water initially with 1 litre BOL'S POOL BRIGHT per 10,000 litres of pool water.
3. For best results superchlorinate at dusk.
4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of BOL'S POOL BRIGHT per 100,000 litres of

pool water. NOTE: Hot weather, heavy pool usage, and rain may require higher dosages to maintain proper chlorine residuals.

5. Superchlorinate weekly with 1 litre per 10,000 litres if average daily temperature is 25 degrees C - 32 degrees C. Otherwise, superchlorinate every other week.
6. For visible algae superchlorinate with 3 litres per 10,000 litres of pool water. Wait at least 24 hours and vacuum pool to remove dead algae.

NOTE: For outdoor pools, chlorine residuals can be stabilized from destruction by sun's rays by addition of proper quantity of cyanuric acid. For WADING POOLS, maintain a chlorine residual of 3 ppm by chlorinating daily. Add 45 mL BOL'S POOL BRIGHT for every 1,000 L of pool water.

PRECAUTIONS KEEP OUT OF REACH OF CHILDREN. Do not mix with any other chemical. Dangerous gas formed when mixed with acid. Avoid contact with skin and eyes. Harmful if swallowed. Keep container closed and store in a cool location. Rinse container thoroughly before discarding. Do not reuse. To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. If eye irritation persists, get medical attention. If swallowed, give one or two glasses of milk or warm water. Call a Physician IMMEDIATELY. Keep patient warm.

STORAGE: Keep container closed. Store away from sunlight and in a cool location.

USE AT ONCE: Stability maximum 6 months. Do not store in trunk of car for extended periods of time.
