MICROWAVE OVEN PROBLEMS ARE UNIQUE. Because the oven interior seldom rises above room temperature, and germs often survive the cooking process. KILLS GERMS ON CONTACT. Cleans stubborn spatters, will not scratch oven finish, shines glass and stainless steel, leaves no grit or haze, kills mold and mildew growth on hard surfaces. It disinfects and leaves the oven walls shining clean, thereby improving the heating pattern within the oven. Clean and disinfect oven cavities, doors, grills, light bulbs, panels, vinyl surfaces, stainless steel, glass pyrex and all other surfaces inside and outside the oven.

DIRECTIONS

1. Shake well. Hold can 15 to 20 cm from surface. Press button and cover with foam. Leave for 10 minutes to disinfect.
2. Wipe off with clean cloth or sponge.
3. For stubborn stains, allow foam to remain on surface longer.

PRECAUTIONS: Contents under pressure. DO NOT place in hot water or near radiators, stoves or other sources of heat. DO NOT puncture or incinerate or store at temperatures above 50 (deg C). KEEP OUT REACH OF CHILDREN. DANGER EYE-IRRITANT. Avoid contact with eyes.

FIRST AID: Contains sodium metasilicate. If splashed in eyes or on skin, flush thoroughly with cold water.
