FLEA KILLER SPRAY

Kills fleas and ticks on cats.

Contains residuals to continue killing fleas.

DIRECTIONS: Shake well before using. Hold container in upright position 25-30 cm from pet and spray entire body beginning at tail and working towards the head. Do not spray face, eyes or scrotum. As you spray, fluff the hair so that spray will penetrate to the skin, but spray only until hair is damp - not wet. Spray ticks directly. Also spray bed and living quarters if needed. Repeat as necessary. Do NOT use on nursing kittens under 8 weeks of age or on nursing females. Do not spray more than once a week. Do not use on sick animals. Do not use on animals under drug or pesticide treatment. For use on pregnant animals consult a veterinarian.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Do not puncture or incinerate container. Do not place in hot water or near radiators, stoves or other sources of heat or store at temperatures over 50 deg Celsius. Do not spray in

eyes, or face, or on scrotum of pet. Discontinue use if dermal or nasal irritation develops. Do not use near fish, food or foodstuffs. Avoid inhalation of spray. Avoid skin contact by wearing rubber gloves. Wash hands after use. When container is empty, press valve to release pressure. Dispose of empty container in regular household garbage. Do not re-use container.

FIRST AID: If sprayed in eyes, flush with clean water. If irritation persists, obtain medical attention. If accidentally swallowed, obtain medical attention at once. If on skin, wash thoroughly with soap and water.
