Diaper Pure*

BABY LAUNDRY DISINFECTANT

The best way to disinfect diapers, baby's clothes, sheets, towels and undergarments. Will not harm delicate fabrics. Diaper Pure disinfects and treats diapers to prevent ammonia diaper rash. Diaper Pure rinses in, and is actually absorbed by the fabric to disinfect diapers. And it stays in to guard against ammonia, which causes diaper rash and wet diaper "burn", for up to 6 hours...works even when diapers are wet and baby cannot be changed. Stops diaper pail odour, too.

DIRECTIONS

AS A DISINFECTING PRE-SOAK FOR ALL REGULAR LAUNDRY

1. Soak laundry in a solution of Diaper Pure by dissolving 60 mL of Diaper Pure to a litre of warm water for at least 10 minutes. Avoid pouring powder directly on laundry.
2. Wash laundry in your regular soap powder or detergent. Rinse as usual.

AS A FINAL RINSE FOR LONG LASTING BACTERIOSTATIC DIAPER PROTECTION

1. Wash diapers with your regular soap powder or detergent. Rinse as usual.
2. Now, make up a germicidal solution of Diaper Pure by dissolving 60 mL of Diaper Pure to a litre of warm water... avoid pouring powder directly on diapers.
3. Rinse diapers in this solution up to 12 at the time. Wring out excess. Dry.
4. At least once a week, put diapers through the normal wash cycle twice.

TO STOP DIAPER PAIL ODOURS

1. Add usual amount of water to diaper pail.
2. Into this dissolve 40 mL of Diaper Pure. Always dissolve Diaper Pure in water before adding diapers. Do not pour directly on diapers.
3. Then add soiled diapers. Always remove solid waste from diaper before putting diaper in diaper pail.
