PRECAUTIONS: Do not allow children to play with collar. Do not unroll collar until ready to use. This collar is intended for use only as an insecticide generator dog collar. Consult a veterinarian before treating nursing animals, pregnant or sick animals or animals under drug treatment. It is not advisable to use this product or similar pesticides on puppies less than 8 weeks old. Any irritation usually indicates that the collar has been affixed too tightly. If irritation occurs, loosen the

collar. If irritation continues, remove the collar from the animal and consult your veterinarian.

DISPOSAL: Dispose of expired collar, any excess collar and pouch with garbage out of reach of children.

Hartz products are designed to complement each other in an integrated program for flea and tick management. To assure proper treatment, we recommend use of only Hartz products. The Hartz Longlife 90 Day Collar is an attractive white collar that kills fleas and ticks, including Deer Ticks, which may carry the organism which causes Lyme Disease, and Rocky Mountain Wood Ticks which may carry the organism which causes Rocky Mountain Spotted Fever. Fleas will be killed within 1 day. Replace collar when effectiveness diminishes. The flea collar may be worn with a regular collar. Wetting will not impair the collar's effectiveness or pet's protection. However, the collar should be removed if the dog is bathed with soap or detergent.

DIRECTIONS: Remove the collar from the package, unroll and STRETCH to activate. This releases the active ingredient at time of use and assures full activity. Place the flea collar around the dog's neck, allowing a spacing of 2 fingers between collar and neck and buckle in place. Leave 5 to 8 cm on the collar for extra adjustment. Cut off any excess length, wrap and dispose of it in the garbage. Wash hands with soap and water after handling collar. For effective flea and tick control, treatment of the pet should be combined with the sanitation of any area used by the pet. Vacuum floors, carpets, and furniture (discard vacuum bag after use) and wash the pet's bedding, living quarters, and surrounding areas. If pest problems persists, an insecticidal premise treatment may be required.

PRECAUTIONS: Do not allow children to play with collar. Do not unroll collar until ready to use. This collar is intended for use only as an insecticide generator dog collar. Consult a veterinarian before treating nursing animals, pregnant or sick animals or animals under drug treatment. It is not advisable to use this product or similar pesticides on puppies less than 8 weeks old. Any irritation usually indicates that the collar has been affixed too tightly. If irritation occurs, loosen the collar. If irritation continues, remove the collar from the animal and consult your veterinarian.

DISPOSAL: Dispose of expired collar, any excess collar and pouch with garbage out of reach of children.
