PRO*FIL® # 12 Ultra Advanced Germicidal Detergent is a no-rinse neutral pH disinfectant cleaner. It disinfects, cleans and deodorizes in one labour-saving step.

PRO*FIL® # 12 Ultra Advanced Germicidal Detergent is an economical concentrate that can be used with a mop and bucket, squeeze bottle, sponge, scrubber or by soaking. It provides effective cleaning strength that will not dull most metal-interlock floor finishes, and does not require a rinse prior to recoat. Labour is maximized by the effective odour control for a long lasting clean.

DIRECTIONS: Dilute PRO*FIL® # 12 Ultra 4 mL per litre of water. Apply with cloth, mop, sponge or scrubber to walls, floors and other hard, nonporous surfaces such as stainless steel, metal, porcelain or plastic. Thoroughly wet the surface; to ensure disinfection, allow 10 minutes wet contact time. Prepare a fresh solution daily or when solution is visibly soiled.

Effectively destroys viruses such as HIV-1, Herpes simplex type 1 and Type 2, Influenza A/PR, Rubella and Vaccinia. Also kills fungi such as Candida albicans, Aspergillus niger (black mold) and Trichophyton mentagrophytes (Athlete's Foot fungus).

Pro*Fil® # 12 Ultra at a dilution of 4 mL/L, kills the Human Immunodeficiency Virus (HIV) on hard, nonporous surfaces in hard water (250 ppm as CaCO₃) and in the presence of organic soil (as 5% blood serum) when used in health care settings where the potential for the presence of HIV-1 on inanimate surfaces is likely.

Personal Protection: On handling items soiled with blood or body fluids, wear protection such as disposable gloves, gowns or eye protection.

Cleaning Procedures: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of germicidal solution.

Directions: Prepare an accurate dilution 4 mL/L in warm to cool water. Apply solution with clean wet mop, sponge or cloth. Allow 10 minutes wet contact time. Remove solution and suspended soil with clean wet mop, sponge, cloth or wet vacuum.

Disposal of Infectious Materials: Blood/Body Fluids should be autoclaved and disposed of according to local regulations for infectious waste material.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

KEEP FROM FREEZING.

This product is to be used in conjunction with the Pro*Fil Chemical Dispensing System.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. FATAL/POISONOUS IF INGESTED, INHALED OR ABSORBED THROUGH SKIN. CORROSIVE. CAUSES EYE AND SKIN DAMAGE. DO NOT GET IN EYES, ON SKIN OR CLOTHING. DO NOT INHALE VAPOURS. Wear full-face protection goggles/faceshield), coveralls, chemical resistant gauntlet gloves, apron, chemical resistant boots and respirator when handling the concentrate or during mixing. Wash hands and face before eating, drinking, smoking, or using the toilet. Avoid contamination of food. Do not store in food processing areas or food storage areas. Food contact surfaces disinfected with this product must be thoroughly rinsed with clean, potable water. When handling diluted product wear impermeable gloves.

FIRST AID: In case of contact, immediately flush eyes or skin with copious amounts of water for at least 15 minutes. For eyes, contact a physician immediately. Remove and wash all contaminated clothing, wash them separately from household laundry before reuse. If ingested, drink milk, egg whites or gelatin solution; if none of these are available, drink large quantities of water. CONTACT A PHYSICIAN or POISON CONTROL CENTRE IMMEDIATELY.
