KONK S FLYING INSECT KILLER- must be used with a special automatic dispenser such as the Air Guard portable (B.V.T.) Electronic Automatic Dispenser.

"The automatic dispenser that activates the valve, releases 27.5 mg of Konk S formula every 7.5 minutes. The continuous use of Konk S Insecticide will reduce the flying insect populations - the effect should be noticeable within a few hours. Each can contains enough product to protect a room of 170 cu. metres for up to 30 days. "For rooms of smaller size reduce the quantity of spray by turning the control switch at back of machine"

DIRECTIONS: Remove protective cap from top of can and insert can in special automatic dispenser. Place dispenser/actuator 2-3 meters above floor at point where air circulation will carry particles throughout the area.

PRECAUTIONS: Contents under pressure: Container may explode if heated. Do not expose to temperatures above 50 'C. Do not puncture or incinerate. Do not contaminate food, feed or water. Avoid contact with skin and inhalation of spray mist. Wash after using. Contents toxic to fish and birds. Do not install directly over polished plastic or varnished surfaces. KEEP OUT OF REACH OF CHILDREN. Dispose of empty container with regular garbage.

NOTICE TO USER: This Control Product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a Control Product under unsafe conditions.

LIMITATION OF WARRANTY: Seller's guarantee shall be limited to the terms set out on the label and subject thereto; the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
