A MICROBICIDE CONTROLLING SLIME FORMING BACTERIA, SULFATE REDUCING BACTERIA, FUNGI AND YEAST IN PAPER MILLS AND PAPER MILL PROCESS WATER SYSTEMS. FOR MILLS IN EASTERN CANADA.

DIRECTIONS FOR USE:

PAPER MILLS AND PAPER MILL PROCESS SYSTEMS: AG6401 Slimicide should be added to a paper making system at a point of uniform mixing such as the head box, beaters, broke chest, save-all tank, or white-water tank.

INITIAL TREATMENT: When the system is noticeably contaminated, add 0.25-1.5 kg of AG6401 Slimicide per metric tonne of pulp or paper (dry basis) as a slug dose. Repeat until control is achieved. Heavily fouled systems should be boiled out prior to initial treatment.

SUBSEQUENT DOSE: When microbial control is evident, add $0.15-1.0~{\rm kg}$ of AG6401 Slimicide per metric tonne of pulp or paper (dry basis) as a slug dose as necessary to maintain control.

PRECAUTIONS: Corrosive - causes irreversible eye damage - causes skin burns. May be fatal if swallowed. May cause allergic skin reaction. Causes asthmatic signs and symptoms in hyper-reactive individuals. Do not get in eyes, on skin or on clothing. Wear goggles, protective clothing, and rubber gloves. Harmful if inhaled. Avoid breathing vapors. Do not swallow. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID INSTRUCTIONS - IF IN EYES: Immediately flush with plenty of water for at least 15 minutes. Do not remove contact lenses, if worn. Get immediate medical attention. IF ON SKIN: Wash with plenty of soap and water. Get medical attention. IF SWALLOWED: DO NOT INDUCE VOMITING: Do not give anything to drink. Seek medical attention with urgency. IF INHALED: Remove to fresh air. If breathing is difficult administer oxygen. If symptoms persist, call physician.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contra indicate the use of gastric lavage. Aspiration may cause lung damage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters. Do not contaminate water, food or feed by storage or disposal.

STORAGE AND HANDLING: AG6401 Slimicide solutions are corrosive to many commonly used materials of construction such as steel, galvanized iron, aluminum, tin and zinc. These solutions can be stored and handled in baked phanolic-lined steel, polyethylene, stainless steel, or reinforced epoxy-plastic equipment. This product freezes at about negative 21EC. Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage times (up to about 1 month), temperatures of up to

28EC. Can be tolerated but the preferred maximum storage temperature is about 27EC. A stainless steel centrifugal pump is suggested for transfer service. Spiral wound stainless steel with TEFLON is suitable for gaskets and packaging.

DISPOSAL:

- 1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
- 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
- 3. Make empty container unsuitable for further use.
- 4. Dispose of the container in accordance with provincial requirements.
- 5. For information on the disposal of unused, unwanted product and the cleanup of spills contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER: This control is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
