KEEP OUT OF REACH OF CHILDREN

CAUTIONS: Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. Rinse empty container thoroughly with water and discard it. This product is toxic to fish. Do not mix with other chemicals.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS:

First application should be made when pool is being filled and before algae has formed. Use at the rate of 200 mL of ALGONE in each 10,000 L of pool capacity. Pour ALGONE directly into pool.

For subsequent treatment, add 100 mL of ALGONE to each 10,000 L of pool water every week. In cool weather, use less often - more often in warm, sunny weather.

Superchlorinate pool water at least 24 hours prior to using Algone ALGAECIDE.

For visible algae, superchlorinate and 24 hours later add 200 mL per 10,000 litres. Continue with weekly maintenance dosage.

For visible algae, when superchlorination is not employed, add 500 mL per 10,000 litres. Wait at least 24 hours and vacuum to remove dead algae.

NOTE: Excessive usage of this algaecide will cause foam formation on pool water surface.
