DIRECTIONS FOR USE

Mix contents into one liter of water. Place the solution in small chick founts or shallow dishes in areas where Norway Rat (*Rattus norvegicus*), Roof Rat (*Rattus rattus*) and House Mice (*Mus musculus*) rodents feed. Replace whenever the solution becomes dirty or contaminated.

For use in DWELLING (as PROTECTED bait placements), FARM BUILDINGS, FOOD SERVICE ESTABLISHMENTS, GRANARY BINS (empty), PROCESSING PLANTS (feed, food, nonfood), STORAGE AREAS (feed, food, nonfood).

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN, PETS AND LIVESTOCK. Harmful if swallowed as it may reduce clotting of the blood and cause bleeding.

FIRST AID: If swallowed, give patient one or two glasses of water and cause vomiting by inserting a finger down the throat; repeat until vomit fluid is clear. Call a physician.

TOXICOLOGY: Vitamin K1 in the form of intravenous, intramuscular or subcutaneous injections, or by oral ingestion are suggested remedial treatments for anticoagulant poisoning. The severity of the case measured by establishing prolonged prothrombin times (P.T.) will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DISPOSAL: Dispose of empty container and unused bait in accordance with local requirements.
