PRECAUTIONS

DANGER - CORROSIVE TO EYES AND CAUSES SKIN BURNS.
MAY CAUSE ALLERGIC SKIN REACTION.
MAY BE HARMFUL IF INHALED.
MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH THE SKIN.

Do not get in eyes, on skin, on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Do not take internally. Wash thoroughly after handling. This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of waters. Apply this product only as specified on this label.

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. If plastic, do not reuse empty container.

DISPOSAL: Pesticide or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Triple rinse (or equivalent) all containers and, for metal containers, offer for recycling or reconditioning (for plastic containers dispose in an incinerator), or dispose in landfill approved for pesticide containers or bury in a safe place.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

DIRECTIONS FOR USE: ISO-CIDE

Solution is recommended for soluble and emulsifiable type aqueous metalworking fluids, such as emulsified petroleum oils, and formulations containing alcoholic fatty acid, sulfonated red oil, or naphthalene sulfonate. These fluids are usually prepared by diluting the product concentrates 1:40 to 1:60 with water. For the maintenance of a nonfouled system, add 290 mL per 10,000 L of emulsion or 290 mL - 1:45 L per 10,000 L every 8-12 weeks. For a noticeably fouled system use initial dosage range of 580 mL - 1:45 L per 10,000 L followed by subsequent dosages depending upon the treatment level noted above. A higher dosage range and/or increased frequency of treatment may be required depending on rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

The preservative should be dispensed into the use-dilution of the metalworking fluid by a metering pump and uniformly dispersed throughout the system. ISO-CIDE weighs 1.25 kg./Litre.

FIRST AID: Do not induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution or if these are

not available, drink large quantities of water. Avoid alcohol.
Call a physician immediately.

IF INHALED: Remove immediately to fresh air. If not breathing,
apply artificial respiration. If breathing is difficult, give
oxygen. Call a physician.

IF ON SKIN: Wash thoroughly with soap and water. Remove and
wash contaminated clothing before reuse.

IF IN EYES: Flush with plenty of water for at least 15 minutes.
Call a physician.

TOXICOLOGY: Probable mucosal damage may contraindicate the use
of gastric lavage. Measures against circulatory shock,
respiratory depression and convulsions may be needed.
