KILLEX WEED STICK is a ready-to-use, non-volatile weed killer. Controls many broad-leaf weeds in lawns including Dandelions, Plantains, Ground Ivy (Creeping Charlie), Chickweed, Black Medick (Yellow Clover), Heal- all, Knotweed, Ragweed, Shepherd's Purse, Devil's Paintbrush, Buttercup, English Daisy and other 2,4-D susceptible weeds.

DIRECTIONS FOR USE: Allow Stick to warm to operating temperature (15-27°C) before use. Remove plastic protective cap. Grasp thicker tube with one hand and thinner tube handle with other hand and twist to expose 1-1.5 cm of herbicidal wax beyond end of larger tube.

Apply directly to stems and leaves of weed with a twisting or

wiping action. For patches of small leafed weeds (Knotweed, Clover, Ground Ivy) contact all leaves with a sweeping action. Use light pressure. It is not necessary to leave a visible coating on the weed.

After use, twist in opposite direction to retract wax tip, then replace protective cap.

WHEN TO USE:

Apply anytime when weeds are actively growing, preferably a day or two after mowing, when temperature is between 15-27°C.

WHAT TO LOOK FOR:

Twisted weed growth should appear in about a week. Weeds such as Ground Ivy may take 4-6 weeks to die.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN AND ANIMALS. Avoid contact with skin, eyes or clothing. Do not touch wax tip to flowers, shrubs, trees or other valuable plants. Do not store near seed, fertilizer or other pesticides.

Dispose of empty container in household garbage.

FIRST AID:

In case of skin contact, wash well with soap and water.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
