APPLICATION INFORMATION:

SHAKE WELL BEFORE USE AND DURING USE

Pro-Premises Insecticide may be applied as a GENERAL SURFACE SPRAY.

For General Treatment Control of: Fleas. Also effective against cockroaches, ants, crickets, silverfish, firebrats, weevils, psocids, spiders, beetles, centipedes.

Use Areas: Residences and kennels.

Pro-Premises Flea Spray in the 825 mL bottle will provide 1 treatment of an area 25 sq. metres (270 sq. ft.)

NOTE: IF NOZZLE BECOMES PLUGGED DURING USE, REMOVE NOZZLE FROM SPRAYER AND ALSO FILTER FROM BOTTOM OF TUBE AND CLEAN BOTH WITH WATER.

TO PROPERLY TREAT FOR FLEAS, FOLLOW THESE INSTRUCTIONS:

1. Remove or thoroughly clean your pet's bedding.
2. Thoroughly clean and vacuum your home. Tightly seal vacuum bag and dispose in the garbage.
3. Shake Pro-Premises Flea Spray container vigorously for 15-20 seconds to disperse all the microcapsules before spraying.
4. Spray Pro-Premises Flea Spray on any area that may be harbouring fleas. Pay special attention to cover pet resting areas and areas of frequent pet contact. This usually includes furniture, under beds, hallways, closets, etc. Flooring, particularly carpets, should be sprayed thoroughly. Do not apply directly to pets.

NOTE: WE RECOMMEND PATCH TESTING CARPETS AND FURNITURE ON A HIDDEN AREA AND ALLOW THESE AREAS TO DRY BEFORE APPLICATION.

5. We recommend you limit vacuuming to high traffic areas for at least 30 days. Vacuumed areas should be lightly retreated to help ensure that the flea cycle is broken. Pro-Premises Flea Spray has extended residual activity.

The product continues working up to 30 days against fleas when the above instructions are followed.

6. Repeat application as needed.

Pro-Premises Insecticide does not leave an excessive residue. If sprayed to run-off, Pro-Premises Insecticide may be easily removed by wiping with a damp cloth or vacuuming.

IMPORTANT INFORMATION

- Pyrethrin Insecticides are hazardous to fish - cover your aquarium.
- Pro-Premises Insecticide products will not harm plants.
- Pro-Premises Insecticide products are virtually odourless- you do not have to leave your home after spraying.

EXPECTATIONS

1. How long does Pro-Premises Insecticide last? Pro-Premises Insecticide Spray begins working upon drying (approximately 24 hours) and remains active up to 30 days.
2. Which flea stages will Pro-Premises Insecticide kill? Pro-Premises Insecticide kills the adult flea only. Fleas lay hundreds of eggs that will hatch in a minimum of 3 week to 2 years.
3. Are additional treatments of Pro-Premises Insecticide necessary? If fleas take longer than 30 days to hatch, additional treatments of Pro-Premises Insecticide will be necessary. Repeating use of Pro-Premises Flea Spray can be used in regions of heavy flea infestation as a control measure.
4. Will fleas die immediately after spraying? Pro-Premises Insecticide capsules are inactive when wet. It may take 24-48 hours to see a significant reduction in the flea population. Once the flea picks up a significant number of dry Pro-Premises Insecticide capsules, it will die within hours. The flea will become noticeably sluggish before death.
5. Will new fleas be seen in the home over the 30-day period? In severe cases, new outbreaks may occur. This is a result of egg hatching. This new outbreak will be

controlled by Pro-Premises Flea Spray.

FOR BEST RESULT

1. Follow all instructions carefully.
2. Keep your pet and home treated throughout flea season if necessary to prevent reinfestation from outdoors.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN, HUMANS AND DOMESTIC ANIMALS: Avoid contact with skin, eyes and clothing. Avoid inhalation of spray. Avoid breathing spray mist. Keep container closed when not in use. Cover or remove fish bowls and aquaria. Remove pets for one hour when spraying. Food should be removed or covered before treatment. All food contact surfaces and cooking utensils should be covered during treatment or thoroughly cleaned before using. Wash hands after spraying and before eating or smoking. Do not use in nurseries or rooms where infants, ill or aged persons are confined. This product may pose a hazard to pollinating insects. Do not contaminate any body of water.

FIRST AID: In case of contact with eyes, immediately flush with plenty of water. If irritation persists, get medical attention. If on skin, wash with soap and water. If swallowed, CONTAINS A PETROLEUM DISTILLATE. DO NOT INDUCE VOMITING. See physician.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

DISPOSAL: Do not reuse empty container. Wrap and discard with household garbage. Do not store below 0EC. If exposed to temperatures below 0EC, thaw completely and mix well before using.
