DIPHACIN MEAL MAY BE USED IN DWELLINGS, KITCHENS, STORAGE AREAS, AND AROUND HOMES, FARM BUILDINGS, FOOD SERVICE ESTABLISHMENTS, SEWERS, ETC.

DIRECTIONS FOR USE:

TO CONTROL HOUSE MICE, NORWAY RAT, AND ROOF RAT: Place the bait in locations frequented by rodents, such as tunnels, feeding areas, and runways. For rats, set out piles of 15-60 grams at intervals of 2-3 meters. Replace bait which becomes damp or moldy. Maintain an uninterrupted supply until feeding ceases.

NOTE: In food processing plants and kitchens, place bait in protected bait stations on the floor only; do not place in

overhead locations. Wash thoroughly any tables, cutting blocks, or equipment accidentally contaminated. Do not apply bait during production hours or near open foodstuffs.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. If taken in large or repeated doses by humans or animals, it may reduce the clotting ability of the blood and cause internal bleeding. Place baits in protected places inaccessible to children and domestic animals, or in tamper-proof bait boxes. Do not contaminate food or feed. Do not contaminate any body of water. Burn or bury bodies of dead rodents.

FIRST AID: If swallowed, give patient one to two glasses of water and cause vomiting by inserting a finger down the throat; repeat until vomit fluid is clear. Call a physician.

TOXICOLOGICAL INFORMATION: Blood transfusions combined with intravenous injections and oral doses of Vitamin k1 are indicated, as for hemorrhage caused by overdoses of dicumarol.
