Sternson 910 is used to control algae, bacteria and fungi in recirculating commercial and industrial water cooling towers and air washers.

STERNSON 910 IS EFFECTIVE AT ALL pH VALUES AND WILL NOT CAUSE FOAM.

DIRECTIONS FOR USE

Prior to the use of Sternson 910 in water cooling towers, systems should be cleaned to remove algal growth, microbiological slime and other deposits. Then make an initial slug addition of 250 mL of Sternson 910 per 10,000 litres of water in the system. Repeat initial dosage until control is evident.

Make subsequent slug additions of 150 mL of Sternson 910 per 10,000 litres of water every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.
