DIRECTIONS

1. This is a combined insecticide/fungicide spray material.
2. May be used in all conventional type sprayers and garden hose spray guns.
3. Mix 12 mL per litre of water.

FRUIT TREES - GENERAL

Apply at bud burst and at 7 - 14 day intervals throughout the season. On apples and cherries, do not use within 7 days of harvest, on peaches within 21 days of harvest.

APPLES: Controls - codling moth, red-banded leaf roller, spider mites, tent caterpillars, apple scab, bitter rot.

CHERRIES: Controls - aphids, red-banded leaf roller, brown rot, blossom blight.

PEACHES: Controls - Oriental fruit moth, spider mites, aphids, brown rot, blossom blight.

SHADE TREES AND SHRUBS, FLOWERS AND ORNAMENTALS - GENERAL

Spray thoroughly both upper and lower leaf surfaces. Apply when plants begin to grow and at 7 - 14 day intervals or as needed.

SHADE TREES AND SHRUBS: Spray for control of spider mites, elm leaf miners, soft brown scale, black scale crawlers, oyster shell scale, cankerworms, tent caterpillars, leaf roller caterpillars, etc.

FLOWERS AND ORNAMENTALS: Spray for control of aphids, thrips, leaf hoppers, flea beetles, mealy bug, spittle bugs, plant bugs, cankerworms, white flies and black spot on roses.

PRECAUTIONS:

This product is a dermal irritant and a potential skin sensitizer. Appropriate protective clothing should be worn while handling. May cause eye irritation. Protective eye wear should be worn while handling. Avoid breathing spray mist. Wash hands thoroughly after use. Do not spray blossoms, especially of fruit trees, when bees are actively foraging. Spray in the early morning or evening when bees are less active.

DECONTAMINATION AND DISPOSAL:

Discard empty containers with household garbage.

FIRST AID:

If swallowed, do not induce vomiting. If in eyes, flush with water. Call physician.

TOXICOLOGICAL INFORMATION:

Antidote - Atropine
