SWEEP(R)
NO-TILL Herbicide

A liquid herbicide with wetting agent

DANGER POISON

WARNING

READ THE LABEL BEFORE USING

- DANGER: MAY BE FATAL IF SWALLOWED.
- NEVER TRANSFER TO OTHER CONTAINERS.
- KEEP OUT OF REACH OF CHILDREN AND ANIMALS.
- STORE TIGHTLY CLOSED IN ORIGINAL CONTAINER AND IN A SAFE PLACE.
- CALL A DOCTOR IN CASE OF ACCIDENT

GUARANTEE: Paraquat 250 g per litre (as dichloride)

REGISTRATION NO. 15843 PEST CONTROL PRODUCTS ACT

ZENECA Agro,
a business of ZENECA Corp.
250-3115 12th Street N.E.
Calgary, AB T2E 7J2

B93/A-3

PRECAUTIONS

DANGER - May be fatal if swallowed. Never transfer to other containers. Keep out of reach of children and animals. DO NOT USE SWEEP UNDILUTED. The maximum spray concentration used should

not exceed 2 parts SWEEP to 100 parts water (2.25 L SWEEP to 112 L water). WEAR RUBBER GLOVES, SAFETY GOGGLES AND A FACE SHIELD when handling the concentrate. PREVENT all contact of the concentrate with the skin and eyes. AVOID WORKING in spray mist. AVOID CONTACT with spray solution. REMOVE HEAVILY CONTAMINATED CLOTHING IMMEDIATELY and wash before re-use. WASH hands and face thoroughly after spraying and before smoking or taking meals. DO NOT CONTAMINATE FEEDS, FOODSTUFFS or WATER SUPPLIES. STORE IN ORIGINAL CONTAINER tightly closed, in a safe place away from children. If freezing occurs, warm to room temperature and agitate until reconstituted. When spraying, avoid application of drift onto crops, ornamental plants, lawns, grazing areas or other desirable growth.

FIRST AID

If swallowed, induce vomiting if not already occurring. Get to nearest hospital FAST. THIS IS ESSENTIAL. If delay unavoidable, administer fluids and induce further vomiting and contact a poison control centre.

If in eyes, flush with clean water for 15 minutes and get medical attention.

If on skin, wash thoroughly with water. Remove contaminated clothing immediately; wash before re-use.

TOXICOLOGICAL INFORMATION

The following information is relevant because SWEEP contains paraquat. If swallowed, give stomach wash-out and test urine and gastric aspirate for paraquat. If positive, give up to 1 litre of adsorbent suspension (30% Fuller's Earth, activated charcoal or amberlite resin) mixed with a purgative (MgSO₄, Na₂SO₄ or mannitol). Repeat administration of adsorbent suspension for the next 24 hours, plus purgatives as required. Maintain and monitor electrolyte and fluid status daily. Consider haemodialysis or haemoperfusion, using charcoal column. Delay oxygen as long as possible. If in eyes, treat symptomatically, using antibiotics and steroids as necessary.

EMERGENCY TELEPHONE NUMBER

All hours, 1-800-327-8633 (FASTMED) ONLY for health and environmental information.

STORAGE

Store in a cool, dry, well ventilated area away from foodstuffs and out of the reach of children and animals. Keep product from

freezing.

SPILL CLEANUP

Wear appropriate protective equipment (gloves, glasses, apron) when attempting to clean up the spill. If the container is leaking, secure leak and place the container into a drum or heavy gauge plastic bag. Contact ZENECA Agro (see EMERGENCY TELEPHONE NUMBER) for further information.

For spills and leaks - contain the liquid with dikes of Inert material (soil, clay, kitty litter etc.). Absorb the spill onto inert material and shovel into a seal able waste container.

On hard surfaces - sprinkle spill area with detergent and scrub in a small quantity of water with a coarse broom. Let stand 10 minutes then absorb onto an inert material and shovel into the waste container.

On soil - remove the top 15 cm of soil in the spill area and replace with fresh soil. Dispose of all waste including scrub brush in accordance with provincial requirements. For more information on the disposal of waste and the clean up of spills, contact the provincial regulatory agency or the manufacturer.

DISPOSAL

Rinse the empty container thoroughly and add the rinsings to the spray mixture in the tank. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

Make the empty container unsuitable for further use. Dispose of container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.

PRODUCT INFORMATION

SWEEP is specially formulated for the agricultural producer who wishes to conserve energy, money, soil moisture and time, to prevent or lessen soil erosion and protect emerging crop seedlings from damage by wind-blown soil.

SWEEP, the No-Till herbicide, can accomplish these positive benefits when used in programmes of chemical summerfallow. SWEEP is versatile, yet the many variables such as climate, crop, soil and weed species require the user to plan the use of SWEEP to suit the conditions of the land to be summerfallowed.

SWEEP is adaptable and easy to use with the following directions.

NOTICE TO USER

This control product is to be used only in accordance with the

directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS FOR USE

Use clean (non-turbid) water for spraying. Applications made on cloudy days, during dull sunlight or just prior to or during periods of darkness, will generally increase the subsequent effectiveness of the treatment. To insure the success of a chemical summerfallow programme, winter annuals must be controlled with 2,4-D, MCPA or GLEAN(R) with a late fall (preferred) or early spring application in the fallow year. DO NOT APPLY BY AIR.

CHEMICAL SUMMERFALLOW: SWEEP is recommended for application only with ground sprayers. For control of emerged annual grasses on summerfallow, apply SWEEP at 1.7 to 2.25 L in 112 to 200 L of water per hectare when annual grasses are in the 2-4 leaf stage. Apply at 2.25 L per hectare under dry conditions or if weed population is very dense. Use 150 to 200L of water when weeds are in the 4 leaf stage. In most seasons, 2 applications will be required for annual grass control; one in late May or early June and another in late July or early August.

If broad-leaved weeds such as wild buckwheat or other hard to kill broad-leaved weeds are present at the time of application or between applications of SWEEP, apply one of the following SWEEP tank mixes, or a separate application of a broad-leaved weed herbicide registered for summerfallow use.

Tank Mixes: SWEEP may be tank mixed with GLEAN(R), 2,4-D, MCPA, bromoxynil plus MCPA, BANVEL(R) plus 2,4-D or LOROX(R) plus MCPA. Before tank mixing, consult labels of these herbicides for recommended rates, soil pH, cropping and rotation restrictions. GLEAN(R) and LOROX(R) L plus MCPA should only be applied once per season.

NOTE: Tank mixes of SWEEP with amine formulations of 2,4-D, MCPA and dicamba should be sprayed immediately and not allowed to stand overnight or the effectiveness of the spray will be reduced.

CLEANING SPRAYERS: Thoroughly wash equipment after spraying - Use AGRAL(R) 90 at 60 mL per 100 L of water, flush and spray out, then thoroughly rinse with clean water. When possible, fill sprayer with clean water and let stand overnight, then empty.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons

or property arising from the use or handling of this product, and accepts the product on that condition.
