PRO GUARD

NET CONTENTS: 6 kg

Pro Guard Super Pucks are specially formulated tablets that are designed to meet the rigorous demands of discerning pool owners. The patent-pending formulation improves water quality, sanitizes and clarifies, all in an easy to use tablet.

Weight per tablet: 200 grams.
DIRECTIONS FOR USE

Warning: Direct tablet contact may cause bleaching of vinyl or painted pool surfaces. Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers

to avoid the probability of an explosion.

1. Maintain recommended daily levels as determined by a testing kit:

Free available chlorine: 1.0-3.0 ppm

pH: 7.2-7.8

Total Alkalinity: 100-120 ppm

Calcium Hardness: 200-300 ppm

2. For outdoor pools, chlorine residuals can be protected from destruction by the sun's rays by adding 300 grams of Stabilizer (cyanuric acid) per 10,000 litres of pool water to yield the required initial concentration of 30 ppm.
3. If using an automatic chlorinator, fill the chamber (s) with Super Pucks and adjust the flow rate, according to manufacturer's recommendations to maintain proper chlorine residual. Adding Super Pucks to the pool's skimmer basket is an alternative chlorine feed method. Daily usage should approximate 20 grams of Super Pucks per 10,000 litres of pool water.

Note: Hot weather, heavy pool usage and rain may require higher usage rates to maintain proper chlorine residuals. Use a test kit regularly.

4. Periodic superchlorination of pool water is recommended. Follow label directions of superchlorination product being employed.
5. Super Pucks contains stabilizer which can accumulate in pool water. Keep stabilizer level within the range of 30-100 ppm by dilution with fresh water.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. Harmful if swallowed. Keep container closed and store in a cool, dry location. Rinse container thoroughly before discarding. Do not reuse. For information on the disposal of unused, unwanted product and the clean up of spills, contact the Provincial Regulatory Agency or the manufacturer.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. If eye contact occurs, get medical attention. If swallowed, drink one glass of milk or water. Do not induce vomiting. Never give anything to an unconscious person. Call a physician or Poison Control Centre immediately.
