#### COOLING TOWER SYSTEMS

Prior to the use of Formula 093-B in water cooling towers, systems should be cleaned to remove algae growth, microbiological slime, and other deposits. Then make an initial slug addition of 800 to 1,200 mL of Formula 093-B per 10,000 litres of water contained in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 400 to 1,200 mL of Formula 093-B per 10,000 litres of water, every 2 to 5 days or as needed. The frequency of addition depends upon the relative

amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

#### INDUSTRIAL AIR WASHING SYSTEMS

For use in systems equipped with effective mist eliminating components. Prior to the use of Formula 093-B in air washers, systems should be cleaned to remove algae growth, microbiological slime, and other deposits. Then make an initial slug addition of 1,850 to 2,350 mL of Formula 093-B per 1,000 litres of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 850 to 2,200 mL of Formula 093-B per 1,000 litres of water every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump or to the water collector trays.

#### PRECAUTION

##### KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes eye damages and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food. Do not reuse empty container. Destroy by burying. This product is toxic to fish. Keep out of lakes, streams and ponds.

FIRST AID AND TOXICOLOGY: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. Remove contaminated clothing and wash before reuse. For eyes, call a physician. If swallowed, give patient doses of powdered charcoal immediately or all he can swallow of raw egg whites, milk, gruel or flour and water. Then induce vomiting. Call a physician immediately. Probable mucosal damage may contraindicate the use of gastric lavage. Measure against circulatory shock, respiratory depression, and convulsion may be needed.

NOTICE TO USER: This control product is to be used only in accordance with the direction on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe condition.

NOTICE TO BUYER: Seller's guarantee shall be limited to the

terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
