SUPER PRO is a high strength sodium hypochlorite solution which exhibits excellent algaecidal and disinfectant properties. Proper use of SUPER PRO in conjunction with a regular maintenance programme will give a pool free from harmful micro-organisms.

DIRECTIONS

Water Chlorination: Add SUPER PRO daily to maintain .6-1.0 parts per million of available chlorine (PPM Cl 2). Daily charge depends upon air temperature and number of people in the pool.

Total daily SUPER PRO charge	Litres of Water
------------------------------------	-----------------

125 mL - 250 mL	10,000
325 mL - 625 mL	25,000
625 mL - 1.25 L	50,000
1.25 L - 2.50 L	100,000
3.25 L - 6.25 L	250,000

ALGAE: Add 375 mL of SUPER PRO for every 10,000 L of water and circulate for at least 8 hours. If algae persists, use a weak solution of muriatic acid and scrub walls with brush. Do not use pool until available chlorine has fallen to 2.0 P.P.M. CI2.

pH CONTROL: A pH of 7.2 to 7.6 is acceptable. Add muriatic acid if HIGH. Add soda ash if LOW.

WADING POOLS: Add 5 mL of SUPER PRO for every 250 L of water daily.

CAUTION

Keep out of reach of children.

Corrosive material. Contains sodium hypochlorite and sodium hydroxide. Do not expose to skin or eyes. For maximum stability keep in a cool dark area. "Dangerous gas formed when mixed with acid."

Do not mix with ammonia or toilet bowl cleaners.

FIRST AID INSTRUCTIONS

Avoid exposure of concentrate to skin or eyes. If swallowed give one or two glasses of milk or warm water, keep the patient warm and call a physician at once. If exposed to skin, remove clothing from affected areas and flush with copious amounts of warm water. If exposed to eyes, flush with copious amounts of warm water for at least 15 minutes. Call a physician.
