7 Meridian Rd.,
Etobicoke ON. M9W 4Z6 (416)675-1638
1-800-561-7302

DIRECTIONS FOR USE:

FOR CONTROL OF ADULT MOSQUITOES AND BLACKFLIES - OUTSIDE
AROUND RACE TRACKS, GOLF COURSES, AMUSEMENT PARKS, CAMP AREAS,
RESORTS, MOTELS, OUTDOOR THEATRES, ROADSIDE STANDS, FARMS,
WAREHOUSES - OUTDOORS, AROUND HOMES, COTTAGES, SWIMMING POOL
AREAS.

GENERAL:

A ready to use formulation of the proven insecticide Propoxur for rapid knockdown and kill of adult mosquitoes and blackflies in outdoor areas. Maintains its killing efficiency at low temperatures.

Read and understand the directions for the fogger being used. Fill the insecticide tank of the fogger as directed. For best results in smaller areas, apply a dense fog when the air is calm.

Allow the fog to drift over the area to be treated to contact as many insects as possible. The best time to fog is, when most of the mosquitoes or blackflies are actively flying; that is, evening or early morning. Also at this time there is generally little wind and rising air currents are at a minimum.

Larger areas will be more easily covered if applications are made when the winds are light and at right angles to the wind. Under these conditions, fog will drift 90 m downwind.

Applications should be made at the rate of 30 mL per 100 m² of areas being treated.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed. Avoid inhalation or skin contact. Wash thoroughly after using. Do not contaminate feed or food and do not apply to croplands.

Avoid contamination of animal feeding areas such as pastures and other foraging areas.

Do not contaminate water supplies, streams, lakes or ponds. Do not use as an indoor space spray. Do not apply to animals or humans. Toxic to bees. Do not treat plants directly. Do not reuse empty container. Dispose of with household garbage.

FIRST AID:

In case of poisoning call a physician or Poison Control Centre **IMMEDIATELY**. If swallowed, induce vomiting. Administer milk or water freely

and again induce vomiting until vomit fluid is clear. If on skin remove contaminated clothing and wash skin **IMMEDIATELY** with soap and warm water.

If eyes are contaminated, wash **IMMEDIATELY** with flowing water for at least 15 minutes. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

The compound inhibits cholinesterase resulting in stimulation of the central nervous system. This results in a sense of "tightness" in the chest, sweating, contracted pupils, stomach pains, vomiting and diarrhea. The antidote is atropine sulphate administered in large therapeutic doses repeated as necessary to the point of tolerance. Do not give morphine. Watch for pulmonary edema, which may develop in serious cases of poisoning even after 12 hours. At first sign of pulmonary edema, the patient should be placed in an oxygen tent and treated symptomatically.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

DISPOSAL:

1. Triple or pressure-rinse the empty container. Add the rinsings to the treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill.
